Thermal spraying - Evaluation of adhesion/cohesion of thermal sprayed ceramic coatings by transverse scratch testing

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Principle	1
5	Equipment and materials	2
6	Procedures of transverse scratch testing	2
6.1	General requirements for the testing specimen	2
6.2	Environmental conditions	2
6.3	Scratch testing on cross-section	2
6.4	Evaluation of failure mode	3
7	Scratch testing report	4
Annex A (informative) Typical coating failure modes after scratch testing		5
Annex B (normative) Transverse scratch testing record		6
Annex C (informative) Round robin test results of transverse scratch testing for plasma sprayed ceramic coatings		7
Bibliography		26
