ISO 18278-3:2017-08 (E)

Resistance welding - Weldability - Part 3: Evaluation procedures for weldability in spot weld bonding

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Weld bonding equipment 2
4.1 General 2
4.2 Adhesive dispensing equipment 2
4.3 Storage chamber 2
4.4 Electrodes 2
4.5 Welding current 2
4.6 Mechanical settings 2
4.7 Measurement of parameters 2
4.7.1 Temperature 2
4.7.2 Amount of adhesive applied 2
4.7.3 Welding current and electrode force 3
4.7.4 Electrode cooling water flow rate 3
4.8 Measurement of results 3
4.8.1 Weld diameter 3
4.8.2 Detection of expulsion 3

5 Assembly preparation 3

6 Preliminary adjustments 4
6.1 Electrode alignment 4
6.2 Electrode conditioning 4

7 Determination of the welding current range 5
7.1 Test specimens 5
7.2 Welding parameters 5
7.3 Test procedure 5
7.4 Current range criteria 5
7.5 Three sheet and multiple stack-ups 6

8 Estimation of electrode life 6
8.1 Test specimens 6
8.2 Welding parameters 6
8.3 Procedure 6
8.4 Test criteria, interpretation of results 7

9 Test report 7
9.1 General 7
9.2 Welding current range 8
9.3 Electrode life 8

Annex A (informative) Electrode alignment 9

Annex B (informative) Specimens with current shunt 11

Annex C (informative)Specificconditionsforsteelsheetcustomerqualification 13

Annex D (informative) Specimens for destructive testing 16

Annex E (informative) Example of a test report for welding current range 18

Annex F (informative) Example of a test report for electrode life test 19
