DIN EN ISO 15620:2019-09 (E)

Welding - Friction welding of metallic materials (ISO 15620:2019)

Contents

Page

7.2.5 Test procedures 23
7.2.6 Acceptance criteria 25
7.3 Welding procedure approval record (WPQR) 25
7.4 Previous experience 25
7.5 Circumstances mandating requalification 25
7.6 Machine-specific nature of a WPS 26
7.7 Requalification procedure requirements 26

8 Welding personnel 26
8.1 Friction welding machine operator 26
8.2 Friction welding machine setter 26
8.3 Welding coordination personnel (supervisor) 26

Annex A (informative) Relationship of welding parameters 27

Annex B (informative) Additional processes based on friction 29

Annex C (informative) Material combinations weldable by friction welding 32

Annex D (informative) Guidelines for quality assurance 34

Annex E (informative) Examination and test 35

Annex F (informative) Manufacturer's friction welding procedure specification (WPS) 37

Annex G (informative) Characteristics of friction welded components 39

Annex H (informative) Welding procedure approval record form (WPQR) Welding procedure approval -- Test certificate 44
