ISO 25239-5:2020 (E)

Friction stir welding — Aluminium — Part 5: Quality and inspection requirements

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Quality requirements

4.1 General
4.2 Welding personnel
4.2.1 General
4.2.2 Welding operator
4.3 Inspection and testing personnel
4.3.1 General
4.3.2 Personnel performing non-destructive testing (including visual testing)
4.3.3 Destructive testing personnel
4.4 Equipment
4.4.1 Suitability of equipment
4.4.2 Reproducibility tests for qualified machine welding settings
4.4.3 Equipment maintenance
4.5 Welding procedure specification
4.6 Friction stir welding tool
4.6.1 Identification
4.6.2 Friction stir welding tool inspection
4.7 Pre-weld joint preparation and fit-up
4.7.1 Joint preparation
4.7.2 Pre-weld cleaning
4.8 Preheating and interpass temperature control
4.9 Tack welds
4.10 Welding
4.11 Postweld heat treatment
4.12 Inspection and testing
4.12.1 General
4.12.2 Inspection and testing before welding
4.12.3 Inspection and testing during welding
4.12.4 Inspection and testing after welding
4.12.4.1 General
4.12.4.2 Visual testing
4.12.4.3 Penetrant inspection
4.12.4.4 Radiographic testing
4.12.4.5 Ultrasonic examination
4.12.4.6 Service testing
4.12.4.7 Tensile testing
4.12.4.8 Bend testing
4.12.4.9 Hardness testing
4.12.4.10 Fracture testing
4.12.4.11 Other destructive tests
4.12.5 Damaged and non-conforming welds
4.12.6 Weld geometry correction
4.13 Identification and traceability

Annex A (normative) Imperfections, testing and examination, acceptance levels, and ISO 6520-1 reference number
