ISO 23486:2021 (E)

Metallic and other inorganic coatings — Measurement of Young's modulus of thermal barrier coatings at elevated temperature by flexural resonance method

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Apparatus for measuring resonance frequency

6 Specimen

6.1 Shape and dimensions
6.2 Preheat treatment

7 Measuring procedure

7.1 Dimension and mass of specimen
7.2 Resonance frequency

8 Calculation of Young's modulus

8.1 General
8.2 Young's modulus of the substrate
8.3 Young's modulus of BC
8.4 Young's modulus of TC

9 Test report

Annex A (informative) An example of the apparatus for measuring the resonance frequency
