DIN EN ISO 10882-2:2024-12 (E)

Health and safety in welding and allied processes - Sampling of airborne particles and gases in the operator's breathing zone - Part 2: Sampling of gases (ISO 10882-2:2024)

European Foreword **4**

Foreword **5**

Introduction **6**

1 Scope **7**

2 Normative references **8**

3 Terms and definitions **8**
3.1 General terms 8
3.2 Measurement terms 8
3.3 Welding terms 10
3.4 Analytical terms 10

4 Description of measurement methods **11**
4.1 General 11
4.2 Direct reading electrical apparatus 12
4.2.1 Applicability 12
4.2.2 Operating principles 12
4.2.3 Availability 12
4.3 Detector tubes 12
4.3.1 Applicability 12
4.3.2 Pumped detector tubes 12
4.3.3 Diffusive detector tubes 13
4.4 Indirect methods involving laboratory analysis 13
4.4.1 Applicability 13
4.4.2 Pumped sampler methods 13
4.4.3 Diffusive sampler methods 14

5 Requirements **14**

6 Assessment strategy **14**

7 Measurement strategy **15**
7.1 General 15
7.2 Personal exposure measurements 15
7.3 Fixed-point measurements 15
7.4 Selection of measurement conditions and measurement pattern 15
7.4.1 General 15
7.4.2 Screening measurements of time-weighted average concentration and worst-case measurements 15
7.4.3 Measurements for comparison with occupational exposure limit values and periodic measurements 16

8 Sampling **16**
8.1 Sampling position 16
8.1.1 Personal sampling 16
8.1.2 Fixed-point sampling 17
8.2 Sampling equipment 17
8.2.1 Direct reading electrical apparatus 17

8.2.2 Detector tubes ... 17
8.2.3 Pumped sorbent tubes ... 17
8.2.4 Diffusive samplers ... 17
8.2.5 Construction materials ... 17
8.3 Sample filtration ... 17
8.4 Multiple sampling ... 17
8.5 Volume of sampling line ... 18
8.6 Flow rate ... 18
8.7 Handling of temperature, pressure and humidity data ... 18
9 Measurement of individual gases and vapours ... 18
9.1 General ... 18
9.2 Ozone (0,01 ppm to 3 ppm) ... 18
9.2.1 Special sampling requirements ... 18
9.2.2 Direct reading electrical apparatus ... 18
9.2.3 Detector tubes ... 19
9.2.4 Indirect methods involving laboratory analysis ... 19
9.3 Carbon monoxide (3 ppm to 500 ppm) ... 19
9.3.1 Direct reading electrical apparatus ... 19
9.3.2 Detector tubes ... 19
9.3.3 Indirect methods involving laboratory analysis ... 19
9.4 Carbon dioxide (500 ppm to 100 000 ppm) ... 19
9.4.1 Origin ... 19
9.4.2 Direct reading electrical apparatus ... 19
9.4.3 Detector tubes ... 20
9.4.4 Indirect methods involving laboratory analysis ... 20
9.5 Nitric oxide (1 ppm to 100 ppm) and nitrogen dioxide (0,3 ppm to 250 ppm) ... 20
9.5.1 General ... 20
9.5.2 Direct reading electrical apparatus ... 20
9.5.3 Detector tubes ... 20
9.5.4 Indirect methods involving laboratory analysis ... 20
9.6 Vapours ... 21
9.6.1 General ... 21
9.6.2 Direct reading electrical apparatus ... 21
9.6.3 Detector tubes ... 21
9.6.4 Indirect methods involving laboratory analysis ... 21
10 Recording of test data and presentation of results ... 21
Annex A (informative) **Measurement of individual gases and vapours ... 23**
Annex B (informative) **Example of a test report ... 24**
Bibliography ... 27
