DIN 35255:2025-11 (E)

Quality requirements for composite processes

Contents

Page

Foreword 5

Introduction 6

1 Scope 8

2 Normative references 8

3 Terms and definitions 8

4 Core element 1: classification of composites/composite components according to safety requirements 13
4.1 General 13
4.2 Definition of the safety classes 13
4.3 Documentation of the classification according to safety classes 15

5 Core element 2: composite personnel -- competence, knowledge, and experience 15
5.1 General 15
5.2 Composite personnel of the performing level 16
5.2.1 General -- composite personnel of the performing level 16
5.2.2 Functions -- composite personnel of the performing level 16
5.2.3 Duties -- composite personnel of the performing level 16
5.2.4 Competence, knowledge, and experience -- composite personnel of the performing level 16
5.3 Composite coordination personnel (CCP) 16
5.3.1 General -- composite coordination personnel (CCP) 16
5.3.2 Functions -- composite coordination personnel (CCP) 17
5.3.3 Duties -- composite coordination personnel (CCP) 17
5.3.4 Competence, knowledge, and experience -- composite coordination personnel (CCP) 19
5.3.5 Organizational integration of composite coordination 19
5.4 Levels of competence, knowledge, and experience for Composite Personnel (CP) 20
5.4.1 General 20
5.4.2 Requirements of competence, knowledge, and experience for each level 21
5.5 Assignment of the three competence levels to the safety classes 23
5.6 Comparability of competence, knowledge, and experience 24
5.6.1 General 24
5.6.2 Verifying competence, knowledge, and experience 25
5.6.3 Verification of practical professional competence 26
5.7 Monitoring, inspection, and testing personnel 27

6 Core element 3: design and verification of composites/composite components 27
6.1 General 27
6.2 Assignment to safety classes 27
6.3 Requirements 27
6.4 Material system 27
6.5 Factors influencing the composite process 28
6.6 Verification 28
6.6.1 General 28
6.6.2 Method 1 -- real loading in use < maximum load capacity 28
6.6.3 Method 2 -- assembly/component testing 29
6.6.4 Method 3 -- documented experience 29
6.6.5 Method 4 -- combination of methods 1 to 3 29

7 Drafting contracts and subcontracting ... 30
7.1 Contract drafting ... 30
7.2 Subcontracting ... 30

8 Production/manufacturing ... 30
8.1 General ... 30
8.2 General process requirements ... 31
8.2.1 Production planning ... 31
8.2.2 Process design ... 31
8.2.3 Planning the use of production equipment and tools ... 32
8.2.4 Manufacturing documents ... 32
8.2.5 Process verification and release ... 33
8.2.6 Materials ... 33
8.2.7 Transport, storage, and logistics for materials and auxiliary materials ... 34
8.2.8 Manufacturing environment and workplace preparation ... 34
8.2.9 Health, safety, and environmental protection ... 35
8.2.10 Dosing and mixing ... 35
8.3 Documentation during composite manufacturing ... 35
8.4 Reworking ... 36
8.5 Storage, packaging, and transport of composite components ... 36

9 Quality assurance ... 36
9.1 General ... 36
9.2 Quality planning ... 37
9.2.1 General ... 37
9.2.2 Quality planning ... 37
9.2.3 Control of quality planning ... 37
9.3 Quality control ... 38
9.3.1 General ... 38
9.3.2 Test methods ... 38
9.4 Process safety ... 40
9.4.1 General ... 40
9.4.2 Production-accompanying work samples as verification of application quality ... 40
9.4.3 Monitoring of equipment, manufacturing aids and tools ... 40
9.5 Measures in case of deviations ... 40
9.6 Monitoring of test equipment ... 40

10 Maintenance and repair ... 41
10.1 General ... 41
10.2 Maintenance and repair planning ... 41
10.3 Maintenance and repair instructions ... 41
10.4 Carrying out maintenance and repair work/performance rules ... 41
10.5 Documentation ... 42
10.6 Subcontracting ... 42

Annex A (normative) Specifying the comprehensive, specific, and basic competencies ... 43

A.1 Acquisition and determination of competencies for composite personnel ... 43
A.2 Detailed definitions of competencies, knowledge application, practical application, and experience in relation to the subject matters defined in Table A.3 of this Annex ... 45
A.2.1 Comprehensive, decision-making level ... 45
A.2.2 Specific, instructional level ... 57
A.2.3 Basic, performing level ... 63

Annex B (informative) Requirements list for composites ... 69

Bibliography ... 70

Figures Figure 1 -- Composition of personnel for composite technology (composite personnel, CP) ... 15

Figure 2 -- Linking scope of work, safety class, and competence level ... 24

Tables Table 1 -- Classification of composites/composite components depending on the level of safety requirements 14

Table 2 -- Examples of CCP duties 18

Table 3 -- Level of competence, knowledge, and experience for composite personnel (CP) 20

Table 4 -- Minimum requirements for technological competence, knowledge, and experience in composite technology for Composite Coordination Personnel (CCP) and their deputies 23

Table A.1 -- Competence levels -- skills and duties with the corresponding learning objectives for each level 43

Table A.2 -- Examples of typical action verbs depending on the respective competence level 44

Table A.3 -- Subject content on the minimum technological competences for composite processes including development, production, maintenance 44

Table B.1 -- Exemplary list of requirements for composites 69
