ISO 15616-1:2003-03 (E)

Acceptance tests for CO<(Index)2>-laser beam machines for high quality welding and cutting - Part 1: General principles, acceptance condit ions

Contents

Page

page Foreword v

1 Scope 1

2 Normative references 1

3 Terms, definitions and symbols 2

4 Acceptance test conditions 3
4.1 Setting up the CO2-laser beam machine 3
4.2 Power supply 4
4.3 Health, safety and environment 4
4.4 Cooling system 4
4.5 Gas supply and gas supply system 4
4.6 Operation instructions 4

5 Acceptance test principles 4
5.1 Range of system settings 4
5.2 Limit deviations 5
5.3 Precision required 6
5.4 Acceptance report 6

6 Acceptance test 6
6.1 General 6
6.2 General properties 7
6.3 Examination of the focused laser beam 9
6.4 Manipulation system precision, positioning accuracy and trajectory exactness 9
6.5 Welding and cutting speed 10
6.6 Working gas: testing and instrumentation 13
