

ISO 15616-1:2003-03 (E)

Acceptance tests for CO₂-laser beam machines for high quality welding and cutting - Part 1: General principles, acceptance conditions

Contents		Page
page	Foreword	v
1	Scope	1
2	Normative references	1
3	Terms, definitions and symbols	2
4	Acceptance test conditions	3
4.1	Setting up the CO ₂ -laser beam machine	3
4.2	Power supply	4
4.3	Health, safety and environment	4
4.4	Cooling system	4
4.5	Gas supply and gas supply system	4
4.6	Operation instructions	4
5	Acceptance test principles	4
5.1	Range of system settings	4
5.2	Limit deviations	5
5.3	Precision required	6
5.4	Acceptance report	6
6	Acceptance test	6
6.1	General	6
6.2	General properties	7
6.3	Examination of the focused laser beam	9
6.4	Manipulation system precision, positioning accuracy and trajectory exactness	9
6.5	Welding and cutting speed	10
6.6	Working gas: testing and instrumentation	13
