## Welding - Recommendations for welding of metallic materials - Part 7: Electron beam welding

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	2
4	Quality requirements .....	7
5	Storage and handling of parent metals and consumables .....	7
6	Welding facilities .....	7
7	Qualification of the welding personnel .....	8
8	Welding procedure specification .....	8
9	Welding procedure test .....	9
10	Joint preparation .....	9
10.1	Machining .....	9
10.2	Demagnetisation .....	9
10.3	Cleaning .....	10
10.4	Assembly .....	10
11	Joint design .....	10
11.1	Longitudinal seams .....	10
11.2	Circular seams .....	11
12	Evacuation holes .....	12
13	Tack welds, cosmetic passes .....	13
14	Thermal pre- and post heat treatment .....	13
15	Documentation .....	13
Annex A (informative) Information about weldability of metallic materials .....		14
Annex B (informative) Summary of electron beam weldability of metals with reference to Annex C (informative) Information about causes of weld imperfections and prevention .....		25
Annex D (informative) Examples of preparation of circular joints .....		27
Bibliography .....		34
