

ISO 17662 :2005-03 (E)

Welding_ - Calibration, verification and validation of equipment used for welding, including ancillary activities

Contents

page

Foreword.....	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 General requirements.....	3
4.1 General.....	3
4.2 Frequency.....	4
4.3 Requirements	5
4.4 Process data.....	5
4.5 Materials properties.....	5
5 Process data common to more than one welding process.....	6
5.1 Process data common to all welding processes.....	6
5.2 Requirements specific to several welding processes	8
5.3 Requirements specific to arc welding	9
6 Metal arc welding without gas protection (group 11)	11
7 Plasma arc welding (group 15).....	11
8 Resistance welding (groups 21, 22, 23, 24 and 25)	11
9 Gas welding (group 3)	13
10 Friction welding (group 42).....	13
11 Laser beam welding (group 52).....	14
12 Electron beam welding (group 51)	15
13 Stud welding (group 78).....	16
14 Brazing (group 91)	17
14.1 General.....	17
14.2 Manual flame brazing (group 912).....	18
14.3 Mechanized flame brazing (group 912)	18
14.4 Induction brazing (group 916)	19
14.5 Resistance brazing (group 918)	19
14.6 Furnace brazing in protective atmosphere (group 913)	19
14.7 Vacuum brazing (group 924)	20
14.8 Furnace brazing in open atmosphere (group 913).....	22
14.9 Dip brazing (group 914), salt-bath brazing (group 915) and flux brazing (group 93)	23
14.10 Infrared brazing (group 911)	24
15 Preheat and/or post weld heat treatment	24
15.1 Preheat.....	24
15.2 Post weld heat treatment	25
16 Post weld cleaning.....	26

17 Flame cutting (group 81) and other ancillary processes.....26
Annex A (informative) Details for stud welding.....27
Annex B (informative) Acceptance testing of equipment28
Annex C (informative) Parties involved.....29
**Annex ZA (normative) List of corresponding European and International Standards for which
equivalents are not given in the text 30**
Bibliography 31
