DIN EN ISO 22827-1:2006-02 (E)

Acceptance tests for Nd:YAG laser beam welding machines - Machines with optical fibre delivery - Part 1: Laser as sembly (ISO 22827-1:2005)

Contents

Page

Foreword 2

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 6

4 Environmental conditions and operating conditions of acceptance tests 6
4.1 Installation environment 6
4.2 Power supply 6
4.3 Cooling system 6
4.4 Pumping light source 6
4.5 Shielding and assist gas 6
4.6 Operating instruction for users 6

5 Acceptance test 7
5.1 General 7
5.2 Check of parts 7
5.3 Acceptance tests for laser power and optical system 7
5.4 Test for laser beam safety 8
5.5 Test of pressures and flow rates of assist and shielding gases 9

6 Welding test 9

7 Records of test results 9

Annex A (informative) Example of a test report form 10

Annex B (informative) Optional parameters 12

Bibliography 13
