Foreword 2

Introduction 4

1 Scope 5

2 Normative references 5

3 Classification 6

4 Symbols and requirements 8
4.1 Symbol for the product/process 8
4.2 Symbol for tensile properties of all-weld metal 8
4.3 Symbol for impact properties of all-weld metal 8
4.4 Symbol for chemical composition of all-weld metal 9
4.5 Symbol for type of electrode core or the usability characteristics of the electrodes 12
4.6 Symbol for shielding gas 13
4.7 Symbol for welding position 13
4.8 Symbol for hydrogen content of deposited metal 14
4.9 Symbol for conditions of post-weld heat treatment 14
4.10 Rounding-off procedure 14

5 Mechanical tests 14
5.1 Preheating and interpass temperatures 15
5.2 Pass sequence 16
5.3 Post-weld heat treatment (PWHT) condition 16

6 Chemical analysis 17

7 Fillet weld test 17

8 Retest 18

9 Technical delivery conditions 18

10 Examples of designations 18

Annex A (informative) Classification systems 20

Annex B (informative) Description of composition designations for electrodes in the classification system based upon tensile strength and average impact energy of 27 J 23

Annex C (informative) Description of types of electrode core in the classification system based upon yield strength and average impact energy of 47 J 24

Annex D (informative) Descriptions of types of usability characteristics in the classification system based upon tensile strength and average impact energy of 27 J 25

Annex E (informative) Notes on hydrogen content 27
