

# DIN EN 15520:2007-11 (E)

## Thermal spraying - Recommendations for constructional design of components with thermally sprayed coatings

---

<b>Contents</b>	<b>Page</b>
Foreword .....	3
Introduction .....	4
1 <b>Scope</b> .....	5
2 <b>Normative references</b> .....	5
3 <b>Applications and specific properties of thermally sprayed coatings</b> .....	5
4 <b>Basic rules for design of components with thermal sprayed coatings</b> .....	6
5 <b>Design of components for partial coating by thermal spraying and final machining</b> .....	7
6 <b>Machining and post-treatment of thermal sprayed coatings</b> .....	7
7 <b>Instructions for design - Symbolic representation of the sprayed coating on drawings - Test instructions in the parts list</b> .....	8
8 <b>Examples for design suitable for spraying</b> .....	8
Bibliography .....	18
Figures Figure 1 -- Thermal spraying of plane surfaces .....	10
Figure 2 -- Design of rotational symmetrical parts (thermal spraying of external surfaces) .....	11
Figure 3 -- Design of rotationally symmetrical parts (thermal spraying of internal surfaces) .....	12
Figure 4a) -- Partial coating of an internal surface standard spray gun .....	13
Figure 4b) -- Complete coating of an internal surface with special internal spray gun .....	13
Figure 5a) -- Coating pulled continued around chamfered edge .....	13
Figure 5b) -- Coating pulled continued around rounded edge .....	13
Figure 6 -- Examples of design for parts avoiding excessive edge pressure .....	14
Figure 7 -- Example of a lift piston, parent metal: Steel EN 10088-3-1.4571 Designation of coating according to EN 14665 .....	15
Figure 8 -- Example of a pump shaft, parent metal: Steel EN 10083-1 - C35+N .....	16
Tables Table 1 -- Process related features and specific properties of thermal sprayed coatings .....	6
Table 2 -- Basic rules and arguments .....	7
Table 3 -- Customary minimum dimensions for internal spraying .....	9
Table 4 -- Example of a parts list for finished pump shaft (see Figure 8b) .....	17
