DIN 2559-2:2007-09 (E)

Preparation of joints for welding - Part 2: Matching of inside diameters for circumferential welds on seamless tubes

Contents

Page

Foreword 3

1 Scope 4

2 Normative references 4

3 Symbols and definitions 4

4 Dimensions 5
4.1 General 5
4.2 Tolerances 6
4.3 Calculating the matching diameter 6

5 Joint preparation 9

Figures Figure 1 -- Joint preparation as in DIN EN ISO 9692-1, Ref. no. 1.3, matched 5

Figure 2 -- Joint preparation as in DIN EN ISO 9692-1, Ref. no. 1.6, matched 5

Figure 3 -- Relationship between equations in Table 2 and outside diameters and wall thicknesses in Table 6 7

Tables Table 1 -- Tolerances for dp 6

Table 2 -- Equations for calculating dp for tubes with outside diameter as in DIN EN 10216-1:2004-07, Table 6, or DIN EN 10216-2:2004-07, Table 7 6

Table 3 -- Equations for calculating dp for tubes with inside diameter and wall thickness as in DIN EN 10216-2:2004-07, Table 8, or inside diameter and minimum wall thickness as in DIN EN 10216-2:2004-07, Table 10 7

Table 4 -- Equations for calculating dp for tubes with outside diameter and minimum wall thickness as in DIN EN 10216-2:2004-07, Table 9 8

Tabelle 5 -- Equations for calculating dp for tubes ordered cold-finished with outside diameter and wall thickness as in DIN EN 10216-2:2004-07, Table 11 8

Table 6 -- Matching diameter dp as in Table 2 for tubes with outside diameter as in DIN EN 10216-1:2004-07, Table 6, or DIN EN 10216-2:2004-07, Table 7 10

Table 7 -- Matching diameter dp as in Table 3 for tubes with outside diameter as in DIN EN 10216-2:2004-07, Table 9 13

Table 8 -- Matching diameter dp as in Table 6 for cold-finished tubes with outside diameter as in DIN EN 10216-2:2004-07, Table 11 16

Table 9 -- Minimum allowable wall thickness tp for tubes with outside diameter as in DIN EN 10216-1:2004-07, Table 6, or as in DIN EN 10216-2:2004-07, Table 7 19

Table 10 -- Minimum allowable wall thickness tp for cold-finished tubes with outside diameter as in DIN EN 10216-2:2004-07, Table 11 20
