Foreword 3

Introduction 4

1 Scope 4

2 Normative references 4

3 Terms and definitions 5

4 Classification of radiation 5

5 Procedure for reducing radiation emission levels by design 6

6 Strategy for design of shield 6
6.1 Design target 6
6.2 Characterization of all the radiation sources 7
6.3 Radiation fields, beam geometry access and enclosure 7
6.4 Review available of attenuating material 8
6.5 Assess of environmental conditions 9
6.6 Design requirements 9
6.7 Manufacture prototype 11
6.8 Determination of the effectiveness of the shielding 11
6.9 Compare with desired levels set in step 1 and if necessary, modify design 11
6.10 Prepare documentation for users 11
