

DIN EN 12198-3:2008-11 (E)

Safety of machinery - Assessment and reduction of risks arising from radiation emitted by machinery - Part 3: Reduction of radiation by attenuation or screening (includes Amendment A1:2008)

Contents	Page
Foreword	3
Introduction	4
1 Scope	4
2 Normative references	4
3 Terms and definitions	5
4 Classification of radiation	5
5 Procedure for reducing radiation emission levels by design	6
6 Strategy for design of shield	6
6.1 Design target	6
6.2 Characterization of all the radiation sources	7
6.3 Radiation fields, beam geometry access and enclosure	7
6.4 Review available of attenuating material	8
6.5 Assess of environmental conditions	9
6.6 Design requirements	9
6.7 Manufacture prototype	11
6.8 Determination of the effectiveness of the shielding	11
6.9 Compare with desired levels set in step 1 and if necessary, modify design	11
6.10 Prepare documentation for users	11
Annex ZA (informative) !!!!Relationship between this European Standard and the Essential Requirements of EU Directive 98/37/EC""	12
Annex ZB (informative) !!!!Relationship between this European Standard and the Essential Requirements of EU Directive 2006/42/EC""	13
