

# DIN EN 16009:2011-10 (E)

## Flameless explosion venting devices

---

<b>Contents</b>		<b>Page</b>
Foreword .....		3
1	Scope .....	4
2	Normative references .....	4
3	Terms and definitions .....	4
4	Requirements .....	5
4.1	General requirements .....	5
4.2	Flameless explosion venting system design .....	6
5	Types of flameless explosion venting devices .....	6
6	Testing of flameless explosion venting devices .....	7
6.1	General .....	7
6.2	Dust and gas characteristics .....	8
6.2.1	Dust for functional testing .....	8
6.2.2	Gases for functional testing .....	8
6.3	Functional testing .....	8
6.3.1	General .....	8
6.3.2	Volume of test vessel and $V_{max}$ , FV .....	8
6.3.3	Venting device and $p_{stat}$ .....	9
6.3.4	Explosion testing for mechanical integrity .....	9
6.3.5	Explosion testing for flame transmission .....	9
6.3.6	Venting efficiency of flameless explosion venting devices .....	9
6.4	External effects .....	9
6.5	Test report .....	10
7	Information for use .....	11
8	Marking .....	12
9	Packaging .....	12
Annex A (informative) Examples/types of flameless explosion venting devices .....		13
A.1	General .....	13
A.2	Ribbon type flame quenching element .....	13
A.3	Parallel plate type flame quenching element .....	14
A.4	Mesh or gauze type flame quenching element .....	14
A.5	Ceramic type flame quenching element .....	14
Annex B (informative) Flameless venting example .....		16
Annex C (informative) Flameless venting criteria .....		17
C.1	Nature of combustible dust, heat of combustion, flame temperature .....	17
C.2	Effect of flame quenching device blockage .....	18
Annex D (informative) Flameless venting - Pressurization of the surrounding volume .....		20

<b>Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 94/9/EC .....</b>	<b>21</b>
<b>Bibliography .....</b>	<b>22</b>
