

# DIN EN 14491:2012-10 (E)

## Dust explosion venting protective systems

---

<b>Contents</b>		<b>Page</b>
Foreword .....		3
1	Scope .....	4
2	Normative references .....	4
3	Terms and definitions .....	4
4	Venting of enclosures .....	6
5	Sizing of vent areas .....	7
5.1	General .....	7
5.2	Venting of isolated enclosures .....	8
5.3	Special dust cloud conditions .....	9
5.3.1	General .....	9
5.3.2	Pneumatic conveying of product with axial introduction into vessels and silos .....	9
5.3.3	Pneumatic conveying of the product with tangential introduction into vessels and silos ..	10
5.3.4	Free fall filling .....	11
5.4	Protection of interconnected enclosures .....	11
5.5	Protection of pipes .....	12
5.6	Influences of vent ducts .....	13
5.7	Design of vent ducts .....	14
5.8	Hybrid mixtures .....	15
6	Supplementary design considerations .....	16
6.1	General .....	16
6.2	Explosion effects external to the vent .....	16
6.2.1	General .....	16
6.2.2	Flame effects .....	16
6.2.3	Pressure effects .....	17
6.2.4	Effects of flameless explosion venting devices .....	18
6.2.5	Recoil forces .....	18
6.2.6	Vacuum breakers .....	19
7	Marking .....	20
8	Information for use .....	20
Annex A (informative) Explosion venting of dust filters .....		21
Annex B (informative) Explosion venting of cyclones .....		23
Annex C (informative) Estimating the L/D ratio when calculating vent areas for elongated enclosures .....		24
Annex D (informative) Protection of buildings .....		31
D.1	General .....	31
D.2	Calculating the vent area .....	31
D.3	Calculation of internal surface area .....	32
Annex E (informative) Deflectors .....		33

<b>Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 94/9/EC .....</b>	<b>38</b>
<b>Bibliography .....</b>	<b>39</b>
