# ISO 15202-2:2012-02 (E)

## Workplace air - Determination of metals and metalloids in airborne particulate matter by inductively coupled plasma atomic emission spectrometry - Part 2: Sample preparation

## Contents

Page

Foreword ..... iv

Introduction ..... v

1 Scope ..... 1

2 Normative references ..... 2

3 Termsanddefinitions ..... 2

4 Principle ..... 4

5 Requirements ..... 4

6 Reactions ..... 4

7 Reagents ..... 5

8 Laboratory apparatus ..... 5

9 Procedure ..... 6
9.1 Soluble metal and metalloid compounds ..... 6
9.2 Total metals and metalloids and their compounds ..... 6
9.3 Mixed exposure ..... 6

10 Special cases ..... 7
10.1 Action to be taken if there is doubt about the effectiveness of the selected sample dissolution method ..... 7
10.2 Actiontobetakenwhenparticleshavebecomedislodgedfromthefilterduring transportation 7
10.3 Action to be taken regarding sampler wall deposits ..... 7

11 Laboratory records ..... 7

Annex A (informative)Safetyprecautionstobeobservedwhenusinghydrofluoricand perchloric acids ... 8

Annex B (normative) Sample dissolution method for soluble metal and metalloid compounds ..... 9

Annex C (normative) Sample dissolution using nitric acid and hydrochloric acid on a hotplate ..... 15

Annex D (normative)Sampledissolutionusinghydrofluoricandnitricacidsandultrasonicagitation . 19

Annex E (normative) Sample dissolution using sulfuric acid and hydrogen peroxide on a hotplate ..... 22

Annex F (normative) Sample dissolution using nitric acid and perchloric acid on a hotplate ..... 26

Annex G (normative) Sample dissolution in a closed vessel microwave dissolution system ..... 30

Annex H (normative) Sample dissolution at 95 °C using a hot block ..... 35

**Annex I (normative) Action to be taken when there is visible, undissolved, particulate material after sample dissolution ..... 38**

**Annex J (informative) Sampler wall deposits ..... 43**

**Bibliography ..... 45**
