European foreword 5
FOREWORD 6
1 Scope 8
2 Normative references 8
3 Terms and definitions 9
4 Determination of suitability 10
5 Requirements for equipment with Type of Protection constructional safety “c” 10
5.1 General requirements 10
5.2 Ingress protection 11
5.2.1 General 11
5.2.2 Ingress protection in special cases 11
5.3 Seals for moving parts 11
5.3.1 Unlubricated gaskets, seals, sleeves, bellows and diaphragms 11
5.3.2 Stuffing box seals (packed glands) 12
5.3.3 Lubricated seals 12
5.4 Equipment lubricants, coolants and fluids 12
5.5 Vibration 12
5.6 Requirements for moving parts 12
5.6.1 General 12
5.6.2 Clearance 13
5.6.3 Lubrication 13
5.7 Requirements for bearings 13
5.7.1 General 13
5.7.2 Lubrication 14
5.7.3 Chemical compatibility 14
5.8 Requirements for power transmission systems 15
5.8.1 Gear drives 15
5.8.2 Belt drives 15
5.8.3 Chain drives 16
5.8.4 Other drives 16
5.8.5 Hydrostatic, hydrokinetic and pneumatic equipment 16
5.9 Requirements for clutches and variable speed couplings 17
5.9.1 General 17
5.9.2 Slipping 17
5.9.3 Friction 18
5.10 Flexible couplings 18
5.11 Requirements for brakes and braking systems 18
5.11.1 Brakes used only for stopping in emergency 18
5.11.2 Service brakes (including friction brakes and fluid based retarders) 19
5.11.3 Parking brakes 19
5.12 Requirements for springs and absorbing elements 19
5.13 Requirements for conveyor belts 19

5.13.1 Electrostatic requirements 19
5.13.2 Materials 19
5.13.3 Belt tension 19
5.13.4 Alignment 20
5.13.5 Earthing and bonding 20
6 Requirements for equipment with Type of Protection control of ignition source “b” 20
6.1 General 20
6.2 Determination of the control parameters 20
6.2.1 General 20
6.2.2 Determination of the safety critical values 21
6.3 Ignition prevention system design and settings 21
6.3.1 Determining the performance requirements or operating characteristics 21
6.3.2 Instructions 21
6.3.3 System lockout 21
6.3.4 Operator intervention 22
6.4 Ignition protection of sensors and actuators 22
6.5 Ignition protection types 22
6.5.1 Ignition protection type b1 22
6.5.2 Ignition protection type b2 22
6.5.3 Application of ignition protection types 23
6.5.4 Requirements for ignition protection types 24
6.5.5 Programmable electronic devices 24
7 Requirements for equipment with Type of Protection liquid immersion “k” 24
7.1 Determination of the maximum / minimum criteria 24
7.2 Protective liquid 25
7.3 Equipment construction 25
7.3.1 General 25
7.3.2 Working angle 25
7.3.3 Measures to ensure effectiveness of liquid 25
7.3.4 Accidental loosening 26
7.3.5 Level monitoring 26
7.3.6 Loss of liquid 26
7.3.7 Open equipment 27
8 Type tests 27
8.1 Type tests for equipment with Type of Protection constructional safety “c” 27
8.2 Type tests for equipment with Type of Protection control of ignition source “b” 27
8.2.1 Determination of control parameters 27
8.2.2 Function and accuracy check of the ignition protection system 27
8.3 Type tests for equipment with Type of Protection liquid immersion “k” 27
8.3.1 General 27
8.3.2 Increased pressure test on enclosed equipment having a sealed enclosure that contains static, or flowing protective liquid 27
8.3.3 Overpressure test on enclosed equipment having a vented enclosure 27
9 Documentation 27
9.1 Documentation for equipment with Type of Protection constructional safety “c” 27
9.2 Documentation for equipment with Type of Protection control of ignition sources “”b” 28
9.3 Documentation for equipment with Type of Protection liquid immersion “k” 28
10 Marking 29
10.1 General 29
10.2 Safety devices 29

Annex A (informative) Approach and application: equipment with Type of Protection “c” 30
A.1 General remarks regarding ignition hazard assessment 30
A.2 Stuffing box seal (see Table A.2) 30
A.3 Slide ring seal 32
A.4 Radial seal 37
A.5 Belt drives 41
Annex B (normative) Test requirements 43
B.1 "Dry run" type test for lubricated sealing arrangements 43
B.2 Type test for determining the maximum engaging time of clutch assembly 43
B.2.1 Apparatus 43
B.2.2 Procedure 44
Annex C (informative) Methodology: equipment with Type of Protection “b” 45
Annex D (informative) Approach to assign the required ignition protection type used for equipment to achieve different EPL 46
D.1 For EPL Gc and Dc 46
D.2 For EPL Gb and Db 46
D.3 For EPL Mb 46
D.4 For EPL Ga and Da 47
Annex E (informative) Information on functional safety concept 48
E.1 ISO 13849-1 48
E.2 IEC 61508-1 48
E.3 IEC 62061 48
E.4 Reliability according to functional safety standards 48
Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2014/34/EU 50
Annex ZB (informative) Significant changes between this European Standard and EN 13463-5:2011, EN 13463-6:2005 and EN 13463-8:2003 52
