

ISO 16069:2017-11 (E)

Graphical symbols - Safety signs - Safety way guidance systems (SWGS)

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	Planning a SWGS	4
5	Basic principles for the design of SWGS	5
5.1	Design objectives	5
5.1.1	General	5
5.1.2	Continuity	5
5.1.3	Visual reinforcement	6
5.1.4	Location	6
5.1.5	Destination	6
5.1.6	Avoidance of confusion at decision points	6
5.1.7	Dead ends	6
5.1.8	Minimization of potentially competing or confusing information in the visual field on escape routes	6
5.1.9	Multi-level facilities	7
5.2	Guidance lines	7
5.3	Escape route signs	7
5.3.1	Design	7
5.3.2	Consistency of use	9
5.3.3	Installed position	9
5.4	Signs, markings and plans	10
5.4.1	Marking of stairs, ramps and ladders	10
5.4.2	Marking of emergency exits	10
5.4.3	Marking of fire-fighting, emergency and safety equipment and alarm- initiating devices ...	10
5.4.4	Marking of hazards along the escape route	10
5.4.5	Marking of assembly areas and safe areas at the end of the escape route	11
5.4.6	Marking of escape routes for the specific use of disabled persons	11
5.4.7	Escape and evacuation plan signs	11
5.4.8	Access platforms	11
6	Specific requirements for electrically powered components	11
6.1	General	11
6.2	Requirements for guidance lines and escape route signs	12
6.2.1	Escape route sign luminaire	12
6.2.2	Guidance lines made by point sources and accompanying escape route signs	12
6.2.3	Guidance lines made by line sources and accompanying escape route signs	12
6.2.4	Guidance lines made of discrete luminaires	12
6.3	Marking	12
6.3.1	Marking of stairs and ramps	12
6.3.2	Marking of emergency exits	13
6.3.3	Marking of hazards along the escape route	13
6.4	Emergency power supply and operating conditions for the electrical components	13
6.5	Documentation and logbook	13

6.6	Inspection and maintenance	14
7	Specific requirements for phosphorescent components	14
7.1	General	14
7.2	Luminance requirements for phosphorescent components of a SWGS	14
7.2.1	Minimum luminance properties	14
7.2.2	Minimum luminance required in installed position	15
7.3	Guidance lines and escape route signs and their location within a SWGS	15
7.3.1	Guidance lines	15
7.3.2	Escape route signs	15
7.4	Marking	16
7.4.1	Marking of stairs, ramps and ladders	16
7.4.2	Marking of door frames of emergency exits	16
7.4.3	Marking of hazards along the route	16
7.4.4	Marking of fire-fighting, emergency and safety equipment along the escape route	16
7.4.5	Floor numbering and stairwell identification for multi-storey building	16
7.5	Illumination requirements	17
7.6	Verification of illumination and luminance	17
7.7	Documentation and logbook	17
7.8	Inspection and maintenance	17
Annex A (normative) Measurement of photopic luminance of phosphorescent components in the laboratory		19
Annex B (normative) On-site measurement of luminance performance of phosphorescent components of a SWGS		25
Annex C (informative) Visibility and identifiability of phosphorescent safety way guidance components and their sizing and location		29
Bibliography		39
