DIN EN 1127-1:2019-10 (E)

Explosive atmospheres - Explosion prevention and protection - Part 1: Basic concepts and methodology

Contents

Page

European foreword ... 4

Introduction ... 5

1 Scope ... 6

2 Normative references ... 7

3 Terms and definitions ... 7

4 Risk assessment ... 8
4.1 General ... 8
4.2 Identification of explosion hazards ... 8
4.2.1 General ... 8
4.2.2 Flammability properties ... 9
4.2.3 Explosion behaviour ... 9
4.2.4 Likelihood of occurrence of a hazardous explosive atmosphere ... 9
4.3 Identification of ignition hazards ... 10
4.3.1 General ... 10
4.3.2 Ignition properties ... 11
4.3.3 Likelihood of occurrence of effective ignition sources ... 11
4.4 Estimation of the possible effects of an explosion ... 11

5 Possible ignition sources ... 12
5.1 Hot surfaces ... 12
5.2 Flames and hot gases (including hot particles) ... 13
5.3 Mechanically generated impact, friction and abrasion ... 13
5.4 Electrical equipment and components ... 14
5.5 Stray electric currents, cathodic corrosion protection ... 14
5.6 Static electricity ... 14
5.7 Lightning ... 15
5.8 Radio frequency (RF) electromagnetic waves from 10^4 Hz to 3×10^{11} Hz ... 15
5.9 Electromagnetic waves from 3×10^{11} Hz to 3×10^{15} Hz ... 15
5.10 Ionizing radiation ... 16
5.11 Ultrasonic waves ... 16
5.12 Adiabatic compression and shock waves ... 16
5.13 Exothermic reactions, including self-ignition of dusts ... 17

6 Risk reduction ... 17
6.1 Fundamental priciples ... 17
6.2 Avoidance or reduction of the amount of hazardous explosive atmospheres ... 18
6.2.1 Process parameters ... 18
6.2.2 Design and construction of equipment, protective systems and components ... 19
6.3 Hazardous areas ... 21
6.4 Requirements for the design and construction of equipment, protective systems and components for avoidance of effective ignition sources ... 21
6.4.1 General ... 21
6.4.2 Hot surfaces ... 22
6.4.3 Flames and hot gases ... 24

6.4.4 Mechanically generated impact, friction and grinding 24
6.4.5 Electrical equipment and components 25
6.4.6 Stray electric currents and cathodic corrosion protection 25
6.4.7 Static electricity 26
6.4.8 Lightning 26
6.4.9 Radio frequency (RF) electromagnetic waves from 10^4 Hz to 3×10^{11} Hz 27
6.4.10 Electromagnetic waves from 3×10^{11} Hz to 3×10^{15} Hz 28
6.4.11 Ionizing radiation 28
6.4.12 Ultrasonic waves 29
6.4.13 Adiabatic compression and shock waves 30
6.4.14 Exothermic reactions, including self-ignition of dusts 31
6.5 Requirements for the design and construction of equipment, protective systems and components to reduce the explosion effects 31
6.6 Provisions for emergency measures 32
6.7 Principles of measuring and control systems for explosion prevention and protection 32
7 Information for use 33
7.1 General 33
7.2 Information for commissioning, maintenance and repair to prevent explosion 34
7.3 Qualifications and training 34
Annex A (informative) Information for the use of tools in potentially explosive atmospheres 35
Annex B (informative) Tightness of equipment 36
B.1 General 36
B.2 Normal tightness 36
B.3 Enhanced tightness 37
Annex C (normative) Verification procedure for the threshold limit of ultrasound in liquids 38
Annex D (informative) Significant technical changes between this document and the previous edition of this document 40
Annex ZA (informative) Relationship between this European Standard and the essential requirements of EU Directive 2014/34/EU aimed to be covered 42
Annex ZB (informative) Relationship between This document and the essential requirements of Directive 2006/42/EC aimed to be covered 43
Bibliography 44
