DIN EN 17289-1:2021-02 (E)

Characterization of bulk materials - Determination of a size-weighted fine fraction and crystalline silica content - Part 1: General information and choice of test methods

European foreword 3

Introduction 4

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Symbols and abbreviations 9

5 Test methods 9

6 Guidelines for the determination of crystalline silica 11
6.1 Preparation of sample to be analysed 11
6.2 Sample preparation for further analysis by XRD and FT-IR 11

7 Test report 11

Annex A (informative) Bias and uncertainties 13

A.1 General 13
A.2 Bias between EN 481 and sedimentation SWFF probability function and influence of density and mineral phase mass fraction 13
A.3 Uncertainty 16

Annex B (informative) Round robin test to establish a SWFF reference sample 18

B.1 General 18
B.2 Test material 18
B.3 Evaluation and appraisal method 19
B.4 Results 20

Annex C (informative) Determination of crystalline silica in bulk samples using X-Ray diffraction (XRD) or FT-IR spectroscopy 23

C.1 General 23
C.2 Preparation of bulk samples for determination of CS using XRD 23
C.3 Preparation of bulk samples for determination of CS using FT-IR 26

Annex D (informative) Calculating SWFF and SWFFCS from a given particle size distribution using a spreadsheet 29

D.1 Spreadsheet setup 29
D.2 Example 30
