ISO/TR 22100-5:2021 (E)

Safety of machinery — Relationship with ISO 12100 — Part 5: Implications of artificial intelligence machine learning

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Use of AI in the machinery sector

4.1 General
4.2 Examples for use of AI machine learning in machine applications
4.2.1 Examples without safety implications
4.2.1.1 General
4.2.1.2 Optimization of herbicide spraying machine1 1 For example, see-and-spray machines by Blue River Technology Inc. at the following address: http://smartmachines.bluerivertechnology.com. This is an example of a suitable product available commercially. This information is given for the convenience of users of this document and does not constitute an endorsement by ISO of this product.
4.2.1.3 Optimization of the removal system for a laser cutting machine2 2 For example, see the fact sheet "Examples of artificial intelligence" at TRUMPF (https://www.trumpf.com). This is an example of a suitable product available commercially. This information is given for the convenience of users of this document and does not constitute an endorsement by ISO of this product.
4.2.2 Examples with safety implications

5 Conclusion
