

DIN EN 17199-5:2026-07 (E)

Workplace exposure - Measurement of dustiness of bulk materials that contain or release respirable NOAA or other respirable particles - Part 5: Vortex shaker method

Contents		Page
European foreword		4
Introduction		5
1	Scope	6
2	Normative references	7
3	Terms and definitions	7
4	Symbols and abbreviations	8
5	Principle	8
6	Equipment	10
6.1	General	10
6.2	Test apparatus	12
6.2.1	Vortex shaker apparatus	12
6.2.2	Cylindrical container	12
6.2.3	Humidification system of incoming and dilution air	15
6.2.4	Sampling line for the measurement of the respirable dustiness mass fraction	16
6.2.5	Sampling line for other measurements	18
6.2.6	Conductive flexible tubing, carbon impregnated	20
6.2.7	Respirable cyclone, made of stainless steel	20
6.2.8	Air sampling cassette	21
6.2.9	Condensation particle counter (CPC), with alcohol as working fluid	21
6.2.10	Time- and size-resolving aerosol instrument	21
6.2.11	Aerosol sampler for analytical electron microscopy analysis	22
6.2.12	Analytical balance, capable of weighing to a resolution of 10 µg	22
6.2.13	Microbalance, capable of weighing to a resolution of 1 µg	22
6.2.14	Filters for gravimetric analysis	22
6.2.15	Micro-centrifuge tubes	22
7	Requirements	23
7.1	General	23
7.2	Engineering control measures	23
7.3	Conditioning of the test material	23
7.3.1	General	23
7.3.2	Specified conditions	23
7.3.3	As-received conditions	23
7.4	Conditioning of the test equipment	23
8	Preparation	23
8.1	Test sample	23
8.2	Moisture content of the test material	24
8.3	Bulk density of the test material	24
8.4	Preparation of test apparatus	24
8.5	Aerosol instruments and aerosol samplers	25
9	Test procedure	25

10	Evaluation of data	28
10.1	Respirable dustiness mass fraction	28
10.2	Number-based dustiness index, number-based emission rate and modal aerodynamic equivalent diameters of the particle size distribution	29
10.2.1	General	29
10.2.2	Number-based dustiness index	29
10.2.3	Number-based emission rate	29
10.2.4	Modal aerodynamic equivalent diameters of the number-based particle size distribution	30
10.3	Morphological and chemical characterization of the particles	31
11	Test report	31
	Annex A (informative) Pictures illustrating some of the equipment of the method	33
	Annex B (informative) Examples of TEM images obtained with the vortex shaker method	35
	Annex C (informative) Motivation for development of the vortex shaker method	36
	Bibliography	37
