

DIN EN 71-5/A1:2006-03 (E)

Safety of toys - Part 5: Chemical toys (sets) other than experimental sets

Contents		Page
Foreword		3
12	Test methods	6
12.1	General	6
12.2	Determination of elements in ceramic and vitreous enamelling materials	6
12.3	Determination of plasticizers in oven hardening polyvinyl chloride (PVC) modelling clay sets	11
12.4	Determination of the emission of benzene, toluene and xylenes from oven hardening plasticised PVC modelling sets and plastic moulding sets	23
12.5	Determination of styrene content in polystyrene granules	27
12.6	Identification and determination of substances in photographic processing sets	29
12.7	Determination of organic solvents	50
12.8	Combined approach for the determination of plasticizers in solvent-based adhesives and in solvent-based paints and lacquers, film forming agents in paints and lacquers and modifiers in solvent-based paints and lacquers	70
Annex A (normative) Environmental, health and safety precautions		81
Annex B (informative) Solvent content in different matrices and permitted maximum concentration		82
Annex C (informative) Preliminary test method for the determination of elements in ceramic and vitreous enamelling materials		83
Annex D (informative) Validation of test methods		84
Annex ZA (informative) Clauses of this European Standard addressing essential requirements or other provisions of EU Directives		85
Bibliography		86
