DIN EN ISO 20957-5:2017-04 (E)

Stationary training equipment - Part 5: Stationary exe rcise bicycles and upper body crank training equipment, additional specific safety requirements and test methods (ISO 20957-5:2016)

Contents

Page

European foreword ... **4**

Foreword ... **5**

Introduction ... **6**

1 Scope ... **7**

2 Normative references ... **7**

3 Terms and definitions ... **7**

4 Classification ... **9**

5 Safety requirements ... **12**
5.1 General ... 12
5.2 External construction ... 12
5.2.1 Transmission elements and rotating parts ... 12
5.2.2 Temperature rise ... 13
5.3 Intrinsic loading ... 13
5.3.1 Seat pillar and frame ... 13
5.3.2 Handlebar and frame ... 13
5.3.3 Pedal and frame ... 13
5.4 Seat pillar — Seat ... 13
5.4.1 Insertion depth ... 13
5.4.2 Seat adjustment ... 14
5.4.3 Seat tilting ... 14
5.5 Handlebar stem ... 14
5.6 Stability ... 14
5.7 Additional requirements for recumbent stationary exercise bicycles, upper body crank training equipment and combined crank training equipment ... 14
5.7.1 Combined crank training equipment ... 14
5.7.2 Seat system ... 14
5.8 Additional classified requirements ... 15
5.9 Endurance ... 17
5.10 Additional instructions for use ... 17
5.11 Additional warnings ... 18

6 Test methods ... **18**
6.1 General ... 18
6.1.1 Dimensional check ... 18
6.1.2 Visual examination ... 18
6.1.3 Tactile examination ... 18
6.1.4 Performance test ... 18
6.2 Testing of temperature rise ... 18
6.3 Testing of transmission elements and rotating parts ... 19
6.3.1 Crank and protective cover finger probe examination ... 19
6.3.2 Other moving parts finger probe examination ... 19
6.4 Testing of intrinsic loading ... 19
6.4.1 Seat pillar and frame ... 19
6.4.2 Handlebar and frame ... 19
6.4.3 Pedal and frame 20

6.5 Testing of seat tilting 20
6.6 Testing of seat back rest 20
6.7 Testing of stability 20
6.8 Description of the test device 20
6.9 Testing of constant power mode 21
6.10 Testing of heart rate control mode 21
6.11 Testing of power accuracy for class A 21
6.11.1 General 21
6.11.2 Speed dependent crank training equipment 21
6.11.3 Speed independent crank training equipment 22
6.12 Testing of power repeatability for class B 23
6.13 Endurance test 23
6.13.1 Speed independent crank training equipment 23
6.13.2 Speed dependent crank training equipment 23

7 Test report 24

Annex A (informative) **Example of determining the moment of inertia *J* (looking from the driving axis into a system) 25**
