DIN ISO 19202-1:2018-02 (E)

Summer toboggan runs - Part 1: Safety requirements and test methods (ISO 19202-1:2017)

Contents

Page

National foreword ... **4**

National Annex NA (informative) **Bibliography** ... **5**

Foreword ... **6**

1 Scope ... **7**

2 Normative references ... **7**

3 Terms and definitions ... **8**

4 List of significant hazards ... **9**

5 Safety requirements ... **11**
5.1 Manufacturing ... 11
5.1.1 Materials ... 11
5.1.2 Safety measures against loosening of connections ... 11
5.1.3 Welded joints ... 11
5.1.4 Corrosion and surface protection, protection against rot ... 11
5.2 Toboggan ... 12
5.2.1 General ... 12
5.2.2 Toboggan for rail-guided summer toboggan runs ... 12
5.2.3 Toboggan for tub-guided summer toboggan runs ... 12
5.2.4 Braking ... 13
5.3 Track ... 13
5.3.1 Structural design of the system on the site ... 13
5.3.2 Rail-guided summer toboggan runs ... 13
5.3.3 Tub-guided summer toboggan runs ... 13
5.3.4 Visibility down the track and braking distances ... 14
5.4 Entrance and exit area ... 14
5.4.1 General ... 14
5.4.2 Entrance areas ... 15
5.4.3 End of downhill track ... 15
5.4.4 Exit areas ... 15
5.5 Uphill transport system ... 15
5.5.1 General ... 15
5.5.2 Technical design ... 15
5.5.3 Means of conveyance and connection to the means of conveyance ... 16
5.5.4 Tensioning devices ... 16
5.5.5 Drives and their components ... 16
5.6 Special safety equipment and precautions ... 17
5.7 Clearance zone ... 17
5.7.1 Downhill travel ... 17
5.7.2 Uphill transport ... 18
5.7.3 Squeezing and shearing points ... 18
5.8 Electrical equipment ... 19
5.8.1 Electrical systems ... 19
5.8.2 Control systems ... 19

6 Calculations ... **21**
6.1 General ... 21
6.2 Actions ... 21
6.2.1 General ... 21
6.2.2 Permanent actions ... 21

6.2.3 Variable actions 22
6.2.4 Accidental actions 23
6.2.5 Impact 23
6.2.6 Vibrations occurring in directly passable components 24
6.3 Strength verification by calculation 24
6.3.1 General 24
6.3.2 Toboggan calculation 24
6.3.3 Tub calculation 25
6.3.4 Rail calculation 25
6.3.5 Calculation of supporting structure 25
6.3.6 Brake calculation 25
6.4 Verification of fatigue 26
6.4.1 General 26
6.4.2 Fatigue loads 26
6.5 Verification of stability 26
6.5.1 Safety against overturning, sliding and lifting off 26
6.5.2 Ground anchorages 28

7 Testing and inspection 32
7.1 General 32
7.2 Examination of the technical documentation 33
7.3 Acceptance test prior to commissioning (initial acceptance test) 33
7.3.1 General 33
7.3.2 Functional check 34
7.4 Periodic inspection 35
7.5 Inspection after modification 35
7.5.1 Examination of calculations 35
7.5.2 On-site inspection 35
7.6 Test report 36

8 Marking 36
8.1 Summer toboggan run 36
8.2 Toboggan 37

9 Commissioning 37

10 Technical documentation 37
10.1 General 37
10.2 Construction specification 37
10.3 Structural drawings and manufacturing drawings 37
10.4 Structural calculations 38
10.5 Risk assessment 38
10.6 Operating manual 38

Annex A (informative) **Example of load combinations in accordance with EN 1993 39**

Annex B (normative) **Track calculation 41**
