DIN EN 17860-6:2026-06 (E)

Carrier Cycles - Part 6: Passenger transport

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Classification 7

5 List of significant hazards 7

6 General requirements and test conditions 9
6.1 Number of passengers 9
6.2 Numbers and condition of specimens for the strength tests 9
6.3 Principles of the most onerous condition 9
6.4 Accuracy tolerances of test conditions for strength tests 9
6.5 Fatigue test 10
6.6 Fatigue test for composite components 10
6.7 Plastic material test ambient temperature 10
6.8 Crack detection methods 10

7 General requirements for seats 10
7.1 General 10
7.2 Passenger seating 10
7.2.1 General requirements 10
7.2.2 Test method for dynamic loads 11
7.2.3 Test method for static loads 11
7.2.4 Requirements for armrests 13
7.2.5 Test method resistance to downward forces on the armrests 13
7.2.6 Requirements for footrests 14
7.2.7 Test method for the resistance to downward forces on the footrests 14

8 Ergonomics 14
8.1 General 14
8.2 Determination of the protected volume 14
8.2.1 General 14
8.2.2 Class C9 and C22 15
8.2.3 Classes C36 and A120 17
8.3 Requirements within the protected volume of all classes of the carrier cycle 19
8.3.1 Shear and compression points 19
8.3.2 Folding mechanism 19
8.3.3 Hazardous edges and protrusions 20
8.3.4 Hazard of entrapment - holes and openings 20
8.3.5 Hazard of choking and ingestion of small parts - Class C9 and C22 21
8.3.6 Entanglement hazards of head or other body parts 23
8.3.7 Chemical hazards 24
8.3.8 Thermal hazard 24
8.4 Additional ergonomic requirements – Class C22 24
8.4.1 Requirements for seating area 24
8.4.2 Lateral seat protection 25

8.4.3 Requirements for seat and backrest angle 25
9 Hazards in unattended situations 25
10 Restraint system 25
10.1 General 25
10.2 Attachment of restraint system to the seat 26
10.2.1 Requirements 26
10.2.2 Test method 26
10.3 Strength of the locking component of the restraint system 26
10.3.1 Requirements 26
10.3.2 Test method 26
10.4 Micro-slip and strength of adjusting devices 27
10.4.1 Requirements 27
10.4.2 Test method 27
10.5 Requirements for closure of restraint system 28
10.6 Requirements and test for child-proof retention 28
10.7 Strength of the restraint system 28
10.7.1 Requirements 28
10.7.2 Test method 28
11 Hazards from passenger(s) getting in or out of the seat(s) 29
11.1 Requirement 29
11.2 Test method 29
11.2.1 Test conditions 29
11.2.2 Test area 29
11.2.3 Verification when entering and exiting the carrier cycle 30
12 Connectors for infant carriers 32
12.1 General requirements 32
12.2 Resistance to downward forces 33
12.2.1 Requirements for the resistance to downward forces 33
12.2.2 Test method for the resistance to downward forces 33
12.3 Resistance to upward forces 33
12.3.1 Requirements for the resistance to upward forces 33
12.3.2 Test method for the resistance to upward forces 34
12.4 Test method for the resistance to horizontal forces 34
12.4.1 Requirements for the resistance to horizontal forces 34
12.4.2 Test method for the resistance to horizontal forces 34
13 Requirements for marking 35
14 Instructions for use 36
14.1 General 36
14.2 Warnings 37
Annex A (normative) Test dummy 38
Annex B (informative) A-deviations 40
Bibliography 41
