ISO 24613-2:2020 (E)

Language resource management — Lexical markup framework (LMF) — Part 2: Machine-readable dictionary (MRD) model

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Key standards used by LMF

5 The machine-readable dictionary (MRD) model

- 5.1 General
- 5.2 MRD class model
- 5.2.1 Set of classes
- 5.2.2 Class selection and multiplicity
- 5.2.3 Generalization
- 5.2.4 Object realization
- 5.3 Data category selection and class population
- 5.4 CrossREF allocation
- 5.5 Form subclasses
- 5.5.1 WordForm class
- 5.5.2 Lemma class
- 5.5.3 Stem class
- 5.5.4 WordPart class
- 5.5.5 RelatedForm class
- 5.6 FormRepresentation class
- 5.7 TextRepresentation class
- 5.8 Translation class
- 5.9 Example class
- 5.10 SubjectField class
- 5.11 Bibliography class
- 5.12 Multiword Expression (MWE) Analysis

Annex A (informative) Data category examples

- A.1 Introduction
- A.2 Data category examples
- A.3 Examples of closed data category types and picklists

Annex B (informative) Machine-readable dictionary examples

- B.1 Introduction
- B.2 Example of simple FormRepresentation
- B.3 Example of regional variants
- B.4 Example of different styles in realization
- B.5 Example of multiple scripts and orthographies
- B.6 Example of a bilingual MRD with multiple representations
- B.7 Examples of multiple scripts and orthographies in Chinese
- B.8 Example of Arabic root management
- B.9 Examples of Zulu lexical entries (management of agglutinative features)
- B.9.1 Example of a Zulu noun entry
- B.9.2 Example of a Zulu verb entry
- B.10 Examples of cross-references
- B.10.1 General
- B.10.2 Example of a RelatedForm cross-reference
- B.10.3 Example of antonym cross-references
- B.11 MWE analysis example
- B.12 Example class usage
