ISO 24617-2:2020 (E)

Language resource management — Semantic annotation framework (SemAF) — Part 2: Dialogue acts

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Use cases

5 Basic concepts and metamodel

5.1 Dialogue acts
5.2 Dependence relations
5.3 Rhetorical relations
5.4 Qualifiers
5.5 Metamodel

6 Multifunctionality, multidimensionality and segmentation

6.1 Multifunctionality
6.2 Multidimensionality and dimensions
6.3 Segmentation

7 Specification of the annotation scheme

7.1 Overview
7.2 Dimensions
7.2.1 Overview
7.2.2 Task and Task Management
7.2.3 Auto-Feedback and Allo-Feedback
7.2.4 Turn Management
7.2.5 Time Management
7.2.6 Discourse Structuring
7.2.7 Social Obligations Management
7.2.8 Own- and Partner Communication Management
7.2.9 Contact Management
7.3 Communicative functions
7.3.1 Overview
7.3.2 General-purpose functions
7.3.3 Dimension-specific functions
7.3.3.1 Functions in the Task dimension
7.3.3.2 Functions in the Feedback dimensions
7.3.3.3 Functions in the Turn Management dimension
7.3.3.4 Functions in the Time Management dimension
7.3.3.5 Functions for discourse structuring
7.3.3.6 Functions in the Own and Partner Communication Management dimensions
7.3.3.7 Functions for social obligations management
7.3.3.8 Functions for contact management
7.3.4 Responsive communicative functions
7.4 Functional and feedback dependences
7.5 Qualifiers

8 The Dialogue Act Markup Language (DiAML)

8.1 Overview
8.2 Abstract syntax
8.3 Concrete syntax
8.4 Semantics

9 Extension and customization

9.1 Overview
9.2 Simplifying the annotation scheme: options and selections
9.3 Extending the annotation scheme: triple-layered plug-ins and interfaces

Annex A (normative) Formal specification of DiAML

A.1 Overview
A.2 Abstract syntax
A.3 Concrete syntax
A.4 Semantics
A.4.1 Semantics of dialogue acts and communicative functions
A.4.2 Dialogue acts as update operations
A.4.3 Qualifiers and relations
A.4.3.1 Qualifiers
A.4.3.2 Dependence relations
A.4.3.3 Rhetorical relations

Annex B (normative) DiAML-XML technical schema

Annex C (normative) Data categories for DiAML concepts

C.1 Overview
C.2 Dimensions
C.3 Communicative functions
C.3.1 General-purpose functions
C.3.1.1 Information-seeking functions
C.3.1.2 Information-providing functions
C.3.1.3 Commissive functions
C.3.1.4 Directive functions
C.3.2 Dimension-specific functions
C.3.2.1 Feedback functions
C.3.2.2 Turn-management functions
C.3.2.3 Time-management functions
C.3.2.4 Discourse-structuring functions
C.3.2.5 Own- and partner-management functions
C.3.2.6 Social obligations management functions
C.3.2.7 Contact management functions
C.4 Qualifiers
C.4.1 Conditionality
C.4.2 Certainty
C.4.3 Sentiment

Annex D (informative) Plug-ins for semantic content and other enrichments

D.1 Overview
D.2 Plug-ins for semantic content
D.2.1 Attribute-Value plug-in
D.2.2 Plug-in for events and semantic roles
D.2.3 Plug-in for events, participants, and quantification
D.3 Plug-ins for rhetorical relations
D.4 Plug-ins for additional communicative functions
D.4.1 Overview
D.4.2 Plug-in for application-specific communicative functions
D.4.3 Plug-in for additional SOM functions
D.4.4 Plug-in for additional feedback functions
D.5 Plug-ins for emotion annotation

Annex E (informative) Annotation guidelines and examples

E.1 Segmentation
E.2 Segment explicit and implicit, implied and indirect functions
E.3 DiAML-annotations

E.3.1 Dimensions
E.3.2 General-purpose functions
E.3.3 Dimension-specific functions
E.3.3.1 Auto- and Allo-Feedback
E.3.3.2 Turn Management
E.3.3.3 Time Management
E.3.3.4 Own and Partner Communication Management
E.3.3.5 Discourse Structuring
E.3.3.6 Contact Management
E.3.3.7 Social Obligations Management (SOM)
E.3.4 Qualifiers
E.3.4.1 Certainty
E.3.4.2 Conditionality
E.3.4.3 Sentiment
E.3.5 Dependences and rhetorical relations
E.3.5.1 Functional dependence
E.3.5.2 Feedback dependence
E.3.5.3 Rhetorical relations
E.4 Annotated examples
E.4.1 Short exchanges
E.4.2 Human-computer dialogue
E.4.3 Human-human dialogue
