## Language resource management - Semantic annotation framework (SemAF) - Part 15: Measurable quantitative information extraction (MQIE)

---

| <b>Contents</b>       |   | <b>Page</b> |
|-----------------------|---|-------------|
| Foreword .....        |   | iv          |
| Introduction .....    |   | v           |
| 1                     | Scope .....   | 1           |
| 2                     | Normative references .....                            | 1           |
| 3                     | Terms and definitions .....                           | 1           |
| 4                     | General framework of MQIE .....                       | 2           |
| 4.1                   | Overview .....  | 2           |
| 4.2                   | Primary requirements of MQIE .....                    | 2           |
| 4.3                   | Framework .....                                       | 3           |
| 4.4                   | Preprocessing .....                                   | 4           |
| 4.5                   | Basic element identification .....                    | 4           |
| 4.6                   | Link identification .....                             | 5           |
| 4.7                   | Measure normalization .....                           | 6           |
| 4.8                   | Verification and filtering .....                      | 7           |
| 5                     | Examples .....  | 7           |
| 5.1                   | General .....   | 7           |
| 5.2                   | Sample data .....                                     | 7           |
| 5.3                   | Procedure of extraction .....                         | 8           |
| 5.3.1                 | Overview .....  | 8           |
| 5.3.2                 | Preprocessing .....                                   | 8           |
| 5.3.3                 | Basic element extraction .....                        | 8           |
| 5.3.4                 | Link identification .....                             | 8           |
| 5.3.5                 | Measure normalization .....                           | 9           |
| 5.3.6                 | Verification and filtering .....                      | 9           |
| Annex A (informative) | Examples of applications extended based on MQIE ..... | 11          |
| Annex B (informative) | Informal statements of MQI during extraction .....    | 14          |
| Bibliography .....    |   | 15          |
