Language resource management - Feature structures - Part 1: Feature structure representation

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	General characteristics of feature structure	4
4.1	Overview	4
4.2	Use of feature structures	4
4.3	Basic concepts	5
4.4	Notations	5
4.4.1	Overview	5
4.4.2	Graph notation	6
4.4.3	Matrix notation	7
4.4.4	XML-based notation	8
4.5	Structure sharing	10
4.6	Collections as complex feature values	12
4.6.1	Overview	12
4.6.2	Lists as feature values	12
4.6.3	Sets as feature values	14
4.6.4	Multisets as feature values	15
4.7	Typed feature structure	16
4.7.1	Overview	16
4.7.2	Types	16
4.7.3	Notations	16
4.8	Subsumption: relation on feature structures	18
4.8.1	Overview	18
4.8.2	Definition	18
4.8.3	Condition A on path values	19
4.8.4	Condition B on structure sharing	19
4.8.5	Condition C on type ordering	20
4.9	Operations on feature structures and feature values	21
4.9.1	Overview	21
4.9.2	Compatibility	21
4.9.3	Unification	22
4.9.4	Unification of shared structures	22
4.10	Operations on feature values and types	23
4.10.1	Concatenation and union operations	23
4.10.2	Alternation	24
4.10.3	Negation	25
4.11	Informal semantics of feature structures	27
5	XML Representation of feature structures	29
5.1	Overview	29
5.2	Organization	29
5.3	Elementary feature structures and the binary feature value	30
5.4	Other atomic feature values	32

5.5	Feature and feature-value libraries	35
5.6	Feature structures as complex feature values	37
5.7	Re-entrant feature structures	40
5.8	Collections as complex feature values	41
5.9	Feature value expressions	44
5.9.1	Overview	44
5.9.2	Alternation	44
5.9.3	Negation	47
5.9.4	Collection of values	48
5.10	Default values	48
5.11	Linking text and analysis	50
Annex A (informative) Formal definitions and implementation of the XML representation of feature structures		54
A.1	Overview	54
A.2	RELAX NG specification for the module	54
Annex B (informative) Examples for illustration		60
Annex C (informative) Type inheritance hierarchies		62
C.1	Overview	62
C.2	Definition	62
C.3	Multiple inheritance	64
C.4	Type constraints	64
Annex D (informative) Denotational semantics of feature structure		66
D.1	Feature structure signatures	66
D.2	Feature structure algebra	66
D.3	FS domains	67
D.4	Feature structure interpretations	68
D.5	Satisfiability	68
D.6	Subsumption	68
D.7	Unification	69
Annex E (informative) Use of feature structures in applications		70
E.1	Overview	70
E.2	Phonological representation	70
E.3	Grammar formalisms or theories	70
E.4	Computational implementations	71
Bibliography		75
