Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms, definitions and abbreviated terms 5

4 Non-refrigerated aboveground tanks 8
4.1 General 8
4.2 Causes of overpressure or vacuum 8
4.3 Determination of venting requirements 11
4.4 Means of venting 22
4.5 Considerations for tanks with potentially flammable atmospheres 23
4.6 Relief-device specification 24
4.7 Installation of venting devices 26

5 Refrigerated aboveground and belowground tanks 27
5.1 General 27
5.2 Causes of overpressure or vacuum 27
5.3 Relief-device specification 30
5.4 Installation of venting devices 30

6 Testing of venting devices 31
6.1 General 31
6.2 Flow-test apparatus 32
6.3 Method for determining capacities 33
6.4 Production testing 37

7 Manufacturer's documentation and marking of venting devices 38
7.1 Documentation 38
7.2 Marking 38

Annex A (informative) Alternative calculation of normal venting requirements 40

Annex B (informative) Basis of emergency venting for Tables 7 and 8 49

Annex C (informative) Types and operating characteristics of venting devices 53

Annex D (informative) Basis of sizing equations 62

Annex E (informative) Basis for normal out-breathing and normal inbreathing 74

Annex F (informative) Guidance for inert-gas blanketing of tanks for flashback protection 76

Bibliography 79
