

# ISO/TS 15530-4:2008-06 (E)

## Geometrical Product Specifications (GPS) - Coordinate measuring machines (CMM): Technique for determining the uncertainty of measurement - Part 4: Evaluating task- specific measurement uncertainty using simulation

---

<b>Contents</b>	<b>Page</b>
Foreword .....	iv
Introduction .....	v
1 Scope .....	1
2 Normative references .....	1
3 Terms and definitions .....	1
4 Abbreviations .....	2
5 Requirements concerning uncertainty evaluating software (UES) .....	2
5.1 Specification of the claimed scope of the UES .....	2
5.2 Specification of input to the UES .....	3
5.3 Additional UES documentation .....	3
5.4 GUM compliance .....	3
5.5 Use of results from UES .....	4
Annex A (normative) Checklist -- Declaration of influence quantities .....	5
Annex B (informative) Elements of the uncertainty evaluating software (UES) .....	7
Annex C (informative) Methods of testing uncertainty evaluating software (UES) .....	9
Annex D (informative) Descriptive example -- Physical testing on an individual CMM .....	18
Annex E (informative) Descriptive example -- Computer-aided verification and evaluation .....	20
Annex F (informative) Descriptive example -- Comparison with specific reference results .....	22
Annex G (informative) Descriptive example -- Statistical long term investigation .....	24
Annex H (informative) Relation to the GPS matrix model .....	25
Bibliography .....	26
