## Measurement of clean water flow in closed conduits - Velocity-area method using current-meters in full conduits and under regular flow conditions

---

<b>Contents</b>		<b>Page</b>
Foreword .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and symbols .....	2
3.1	Terms .....	2
3.2	Symbols .....	3
4	Principle .....	4
4.1	General .....	4
4.2	Measurement of the measuring cross-section .....	5
4.3	Measurement of local velocities .....	6
4.4	Location and number of measuring points in the cross-section .....	7
5	Description of the current-meter .....	9
6	Requirements for the use of current-meters .....	9
6.1	Selection of the measuring cross-section .....	9
6.2	Devices for improving flow conditions .....	10
6.3	Calibration of the current-meter .....	11
6.4	Limits of use .....	11
6.5	Inspection and maintenance of current-meters .....	13
7	Setting of current-meters into the conduit .....	13
7.1	Setting of current-meters .....	13
7.2	Mounting in a circular cross-section .....	13
7.3	Mounting in a rectangular cross-section .....	14
8	Determination of the mean axial fluid velocity by graphical integration of the velocity area .....	16
8.1	General .....	16
8.2	Circular cross-sections .....	16
8.3	Rectangular cross-sections .....	18
9	Determination of the mean axial fluid velocity by numerical integration of the velocity area .....	20
9.1	General .....	20
9.2	Circular cross-sections .....	21
9.3	Rectangular cross-sections .....	22
10	Determination of the mean axial fluid velocity by arithmetical methods .....	23
10.1	General .....	23
10.2	Log-linear method .....	23
10.3	Log-Chebyshev method .....	25
11	Uncertainty in the measurement of flow-rate .....	27
11.1	General .....	27
11.2	Sources of error in local velocity measurements .....	27
11.3	Sources of error in estimation of flow-rate .....	28
11.4	Propagation of errors .....	29

11.5	Presentation of results .....	29
11.6	Calculation of uncertainty .....	30
Annex A (normative) Measuring sections other than circular or rectangular sections .....		33
Annex B (normative) Corrections for blockage effect .....		38
Annex C (normative) Recommendations for the selection of the type of current-meter and mounting strut .....		39
Annex D (normative) Example of measuring point distribution along a radius for velocity measurement in a conduit of circular cross-section in the case of the graphical and numerical methods .....		41
Annex E (normative) Determination of boundary layer coefficient, $m$ , for extrapolation near the wall .....		43
Annex F (normative) Definition of terms and procedures used in the uncertainty calculation .....		45
Annex G (normative) Student's $t$ distribution .....		48
Annex H (informative) Examples of values of component uncertainties .....		49
Annex J (informative) Example of calculation of the uncertainty in the flow-rate measurement using current-meters .....		51
