Page

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 6

3 Terms and definitions 6

4 Symbols 10

5 Requirements for metrological characteristics 11
5.1 Single-stylus probing error 11
5.2 Single-stylus probing configuration 12
5.3 Multi-stylus probing errors and values 12
5.4 Multi-stylus probing configurations 13
5.5 Styli 13
5.6 Environmental conditions 13
5.7 Operating conditions 13

6 Acceptance tests and reverification tests 14
6.1 General 14
6.2 Single-stylus probing configuration 14
6.2.1 Application 14
6.2.2 Principle 14
6.2.3 Measuring equipment 14
6.2.4 Procedure 15
6.2.5 Derivation of test results 16
6.3 Fixed multi-probe and multi-stylus probing systems 16
6.3.1 Principle 16
6.3.2 Measuring equipment 17
6.3.3 Procedure 18
6.3.4 Data analysis 19
6.4 Articulating probing systems 20
6.4.1 Principle 20
6.4.2 Measuring equipment 21
6.4.3 Procedure 21
6.4.4 Data analysis 23

7 Compliance with specification 23
7.1 Acceptance tests 23
7.2 Reverification tests 24

8 Applications 24
8.1 Acceptance tests 24
8.2 Reverification tests 24
8.3 Interim checks 24

9 Indication in product documentation and data sheets 25

Annex A (informative) Symbols and subscripts 27

Annex B (informative) Checking the probing system prior to the ISO 10360-2 test 28

Annex C (informative) Interpretation of multi-stylus test results 29

Annex D (normative) Maximum permissible error/limit figures 31

Annex E (informative) Relation to the GPS matrix model 32

Bibliography 34
