

DIN EN ISO 14405-2:2012-03 (E)

Geometrical product specifications (GPS) - Dimensional tolerancing - Part 2: Dimensions other than linear sizes (ISO 14405-2:2011)

Contents		Page
Foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	6
4	Principles and rules for indication of dimensions and related tolerances	7
5	Units used in drawings for dimensions	8
6	Indication of tolerances for linear and angular dimensions	8
7	Illustrations of ambiguous \pm tolerancing vs. unambiguous geometrical tolerancing	8
7.1	General	8
7.2	Linear distance between two integral features	9
7.3	Linear distance between an integral and a derived feature	11
7.4	Linear distance between two derived features	12
7.5	Radius dimension	13
7.6	Linear distance between non-planar integral features	13
7.7	Linear distance in two directions	14
8	Angular tolerancing	15
8.1	Plus/minus tolerancing applied to angular distance	15
8.2	Examples of geometrical tolerancing applied to angular distance between two integral Features	16
8.3	Angular distance between an integral feature and a derived feature	17
Annex A (informative) Explanations and examples of the ambiguity caused by using \pm tolerances for dimensions other than linear size		18
Annex B (informative) Relation to the GPS matrix model		25
Bibliography		27
