

ISO 2692:2014-12 (E)

Geometrical product specifications (GPS) - Geometrical tolerancing - Maximum material requirement (MMR), least material requirement (LMR) and reciprocity requirement (RPR)

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Maximum material requirement, MMR and least material requirement, LMR	5
4.1	General	5
4.2	Maximum material requirement, MMR	6
4.2.1	Maximum material requirement for toleranced features	6
4.2.2	Maximum material requirement for related datum features	7
4.3	Least material requirement, LMR	8
4.3.1	Least material requirement for toleranced features	8
4.3.2	Least material requirement for related datum features	9
5	Reciprocity requirement, RPR	10
5.1	General	10
5.2	Reciprocity requirement and maximum material requirement	10
5.3	Reciprocity requirement and least material requirement	10
Annex A (informative) Examples of tolerancing with , and		11
Annex B (informative) Concept diagram		43
Annex C (informative) Relation to the GPS matrix model		44
Bibliography		46
