

ISO 17599:2015-01 (E)

Technical product documentation (TPD) - General requirements of digital mock-up for mechanical products

Contents		Page
Foreword		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviations	3
5	Classification of digital mock-up	3
5.1	Development stage	3
5.2	Purposes	3
5.3	Data format	3
6	Composition of digital mock-up	4
6.1	Geometric information	4
6.2	Constraint information	4
6.3	Engineering attributes	4
7	Requirements of a digital mock-up model	4
7.1	General principles	4
7.2	Relationship between all kinds of digital mock-up	4
7.3	Requirements of complete digital mock-up	5
7.4	Requirements of sub-system digital mock-up	5
7.5	Requirements of scheme digital mock-up	5
7.6	Requirements of detailed digital mock-up	5
7.7	Requirements of manufacturing digital mock-up	6
7.8	Requirements of geometry digital mock-up	6
7.9	Requirements of function digital mock-up	6
7.10	Requirements of performance digital mock-up	6
7.11	Requirements of special-purpose digital mock-up	7
7.12	Requirements of retrofit digital mock-up	7
8	Requirements of DMU building	7
8.1	General requirements	7
8.1.1	General principles	7
8.1.2	Fundamental requirements	7
8.1.3	Identification of parts or components	8
8.1.4	Definition and use of coordinate system	8
8.1.5	Colouring and texture rendering requirements	8
8.1.6	Model state	8
8.2	Detailed requirements of model building	8
8.2.1	Modelling of parts	8
8.2.2	Assembly modelling	9
8.2.3	Simulation modelling	12
9	Simplification and lightweight models of digital mock-up	13
9.1	Application	13
9.2	General requirements	13

10	Requirements of management	13
10.1	General requirements	13
10.2	Management of the whole DMU life cycle	14
10.2.1	General principles	14
10.2.2	Management of design stage	14
10.2.3	Management of manufacture stage	15
10.2.4	Management of marketing and aftermarket stages	15
10.3	Requirements of data management	15
10.4	Configuration management	16
11	Requirements of review	16
11.1	Purposes and aims of review	16
11.2	Foundations of reviewing	16
11.3	Materials of review	17
11.4	Contents to be reviewed	17
11.4.1	Review of scheme digital mock-up	19
11.4.2	Review of detailed digital mock-up	19
11.4.3	Review of manufacturing digital mock-up	20
11.5	Body of reviewers	20
11.6	Process of review	20
11.7	Summary of review	21
11.7.1	Report of review	21
11.7.2	Conclusion of review	21
11.8	Recheck after review	21
12	Application requirements	21
12.1	General requirements	21
12.2	Detailed requirements	21
12.2.1	Design stage	21
12.2.2	Manufacture stage	23
12.2.3	Marketing stage	24
12.2.4	Aftermarket stage	24
