DIN 16001:2017-04 (E)

Mechanical pressure and temperature gauges - High pressure gauges - Dimensions, Metrology, Requirements and Testing

Contents

Page

Foreword 4

1 Scope 5

2 Normative references 5

3 Definitions 5

4 Nominal sizes 5

5 Pressure ranges 6

6 Accuracy classes 6

7 Dimensions 7
7.1 General tolerances 7
7.2 Cases and flanges 7
7.3 Pressure connections 8
7.3.1 General 8
7.3.2 Internal thread 9/16-18 UNF with inner sealing cone 8
7.3.3 Internal thread M16 × 1,5 with inner sealing cone 8
7.3.4 External thread 9/16-18 UNF LH 9
7.3.5 External thread G3/4B 10
7.3.6 External thread G1/2B 10
7.4 Gaskets 11
7.5 Type of mounting and position of the connection 12

8 Combinations of pressure ranges with pressure connections and components in contact with process medium 13
8.1 Combinations of pressure ranges with pressure connections 13
8.2 Components in contact with process medium 13

9 Requirements 14
9.1 Measurement accuracy 14
9.2 Hysteresis 14
9.3 Temperature effect 14
9.4 Endurance 14
9.4.1 Steady pressure 14
9.4.2 Over-pressure 14
9.4.3 Cyclic pressure 15
9.5 Operating conditions 15
9.5.1 Operating temperature range 15
9.5.2 Temperature range for storage 15
9.5.3 Protection against ingress of water and foreign particles (degree of protection) 15
9.5.4 Effect of mechanical shock 15
9.5.5 Effect of mechanical vibration 15
9.5.6 Leak rate 15
9.5.7 Mounting position 15
9.6 Dials and pointers 16
9.6.1 Scale angle 16
9.6.2 Scale interval 16

9.6.3 Scale marks 16
9.6.4 Scale numbering 16
9.6.5 Pointer dimensions 17
9.6.6 Mirror scales 17
9.6.7 Information on the dial 17
9.6.8 Pointer stop 17
9.7 Safety 18
9.7.1 General 18
9.7.2 Safety pressure gauges 18
9.8 Liquid-filled gauges 18

10 Testing 18
10.1 General 18
10.2 Type approval and production piece tests 18
10.3 Accuracy and hysteresis 20
10.4 Temperature effect 20
10.5 Influence of pressure load 20
10.5.1 Steady pressure and over-pressure 20
10.5.2 Cyclic pressure 20
10.5.3 Accuracy after endurance test 20
10.6 Operating temperature range 20
10.7 Temperature range for storage 20
10.8 Protection against ingress of water and foreign particles (degree of protection) 20
10.9 Effect of mechanical shock 20
10.10 Effect of mechanical vibration 20
10.11 Leak test 21
10.12 Mounting position 21
10.13 Safety 21
10.13.1 Design requirements 21
10.13.2 Blow-out test 21
10.13.3 Energy release test 21
10.13.4 Compliance with safety-related technical requirements 21

11 Packaging for transportation 22

12 Designation 22

Bibliography 23
