## Geometrical product specifications (GPS) - Geometrical tolerancing - Profile tolerancing

---

| <b>Contents</b>       |   | <b>Page</b> |
|-----------------------|---|-------------|
| Foreword .....        |   | iv          |
| Introduction .....    |   | v           |
| 1                     | Scope .....   | 1           |
| 2                     | Normative references .....  | 1           |
| 3                     | Terms and definitions .....   | 1           |
| 4                     | Symbols .....   | 2           |
| 5                     | Rules for profile tolerancing .....   | 3           |
| 5.1                   | General .....   | 3           |
| 5.2                   | Default rules for profile tolerancing .....                                 | 4           |
| 5.2.1                 | Rule A: Definition of the theoretically exact feature (TEF) .....           | 4           |
| 5.2.2                 | Rule B: Type of toleranced feature .....                                    | 5           |
| 5.2.3                 | Rule C: Definition of the tolerance zone .....                              | 5           |
| 5.3                   | Rules for profile tolerancing using additional specification elements ..... | 7           |
| 5.3.1                 | Rule D: Toleranced feature specification elements .....                     | 7           |
| 5.3.2                 | Rule E: Unequally disposed tolerance zone .....                             | 8           |
| 5.3.3                 | Rule F: Linear tolerance zone offset .....                                  | 8           |
| 5.3.4                 | Rule G: Angular tolerance zone offset .....                                 | 8           |
| 5.3.5                 | Rule H: Variable tolerance zone width .....                                 | 8           |
| 5.3.6                 | Rule I: Filtered feature specification elements .....                       | 8           |
| 5.3.7                 | Rule J: Association and parameter specification elements .....              | 9           |
| 5.3.8                 | Rule K: Associated toleranced feature specification elements .....          | 9           |
| 5.3.9                 | Rule L: Non-rigid part .....  | 9           |
| Annex A (informative) | Compound features .....   | 10          |
| Annex B (informative) | Illustration of the rules .....   | 12          |
| Annex C (informative) | Former practices .....  | 42          |
| Annex D (informative) | Relation to the GPS matrix model .....                                      | 44          |
| Bibliography .....    |   | 45          |
