

ISO 20456:2017-09 (E)

Measurement of fluid flow in closed conduits - Guidance for the use of electromagnetic flowmeters for conductive liquids

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Symbols	3
5	Theory and basic formulae	4
6	Construction and principle of operation	4
6.1	General	4
6.2	Sensor	5
6.3	Transmitter	7
6.3.1	General	7
6.3.2	Alternating magnetic field in the measuring system	7
6.3.3	Measuring system with applied pulsed DC excitation (simplified model)	7
6.3.4	Measuring system with applied AC excitation (simplified model)	8
6.4	Flowmeter/Transmitter output	9
7	Equipment marking	9
7.1	Recommended data	9
7.1.1	Sensor	9
7.1.2	Transmitter	10
8	Installation design and practice	10
8.1	Sensor	10
8.1.1	Sizing	10
8.1.2	Mounting conditions	11
8.1.3	Potential equalization -- General requirements	12
8.1.4	Electrical connections	13
8.1.5	Sensor mounting	13
8.1.6	Installation dimensions for flanged connections	14
8.2	Transmitter location	15
8.3	Operational considerations	16
8.3.1	General	16
8.3.2	Effect of the liquid conductivity	16
8.3.3	Reynolds number effect	16
8.3.4	Velocity profile effect	16
9	Flowmeter calibration, validation, and verification	16
9.1	Flowmeter calibration	16
9.2	Flowmeter verification (in-situ electronic verification)	16
10	Evaluation of flowmeter performance	17
10.1	General	17
10.2	Applications within the scope of other standards	17

11	Uncertainty analysis	17
Annex A	(informative) Materials for construction of sensors.....	19
Annex B	(informative) Practical considerations for measuring system with AC and DC excitation.....	22
Annex C	(informative) Cathodic protection.....	23
Annex D	(informative) Conversion of nominal diameters from metric to US units.....	24
Annex E	(informative) Manufacturers' accuracy specifications.....	25
Bibliography	29
