ISO 5458:2018 (E)

Geometrical product specifications (GPS) — Geometrical tolerancing — Pattern and combined geometrical specification

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Symbols and specification modifiers

5 Principles

- 5.1 General
- 5.2 Concepts
- 5.3 Rule A: for position specification
- 5.4 Rules for pattern specification
- 5.4.1 General
- 5.4.2 Rule B: constraints
- 5.4.3 Rule C: indication of a single indicator pattern specification
- 5.4.4 Rule D: indication of a multiple indicator pattern specification
- 5.4.5 Rule E: indication of multi-level single indicator pattern specification
- 5.4.5.1 General
- 5.4.5.2 Sequences of modifiers
- 5.5 Pattern characteristic

Annex A (informative) Former practice, important changes

- A.1 Important changes
- A.2 Former practice

Annex B (informative) Differences between ISO 5458:1998 and this document

- B.1 General
- B.2 Examples of indication between ISO 5458:1998, ISO 1101:2017 and this edition of ISO 5458

Annex C (informative) Examples of pattern specifications

Annex D (normative) Relations and dimensions of graphical symbols

Annex E (informative) Concept diagram for pattern specification and relation with modifiers

Annex F (informative) Relation to the GPS matrix model

- F.1 General
- F.2 Information about the document and its use
- F.3 Position in the GPS matrix model
- F.4 Related International Standards
