DIN EN ISO 14405-2:2019-06 (E)

Geometrical product specifications (GPS) - Dimensional tolerancing - Part 2: Dimensions other than linear or angular sizes (I SO 14405-2:2018)

Contents

Page

European foreword 3

Foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 7

4 Principles and rules for indication of dimensions and related tolerances 7

5 Units used in drawings for dimensions 8

6 Indication of tolerances for linear or angular dimensions 9

7 Illustrations of ambiguous ± tolerancing vs. unambiguous geometrical specifications 9
7.1 General 9
7.2 Linear distance between two integral features 9
7.3 Linear distance between an integral and a derived feature 11
7.4 Linear distance between two derived features 12
7.5 Radius dimension 13
7.6 Linear distance between non-planar integral features 13
7.7 Linear distance in two directions 14

8 Angular tolerancing 15
8.1 Examples of geometrical specifications applied to angular distance between two integral features 15
8.2 Angular distance between an integral feature and a derived feature 16

Annex A (informative) Explanations and examples of the ambiguity caused by using ± tolerances for dimensions other than linear size or angular size 18

Annex B (informative) Relation to the GPS matrix model 26
