

DIN EN ISO 128-2:2022-02 (E)

Technical product documentation (TPD) - General principles of representation - Part 2: Basic conventions for lines (ISO 128-2:2020)

Contents	Page
European foreword	3
Foreword	4
Introduction	5
1 Scope	6
2 Normative references	6
3 Terms and definitions	7
4 Types of lines	8
4.1 General	8
4.2 Basic types	8
4.3 Line sub types	9
4.4 Variations of the basic types of lines	9
4.5 Combinations of lines with the same length	9
4.5.1 Arrangement of two or more lines parallel to each other	9
4.5.2 Arrangement of two different types of lines	10
4.5.3 Arrangement of two continuous lines parallel to each other with regularly recurring connecting elements between them	10
4.5.4 Arrangement of regularly recurring geometric pictorial elements in association with continuous lines	10
5 Line dimensions	11
5.1 Line width	11
5.2 Deviation in line width	11
5.3 Configuration of lines	11
6 Draughting of lines	12
6.1 Spacing	12
6.2 Junctions	12
6.2.1 Types	12
6.2.2 Representation	14
6.3 Location of a second line	15
6.4 Hierarchy of overlapping lines	15
7 Colours	16
8 Designation	16
9 Basic conventions and applications for leader lines and reference lines	16
9.1 Presentation of leader lines	16
9.2 Representation of reference lines	19
9.3 Indication of instructions	20
Annex A (informative) Preparation of lines by CAD systems	21
Annex B (normative) Lines on construction technical drawings	34
Annex C (informative) Examples of application on construction technical drawings	37
Annex D (normative) Types of lines and their application on mechanical engineering technical drawings	43
Annex E (informative) Examples of application on mechanical engineering technical drawings	47
Annex F (normative) Types of lines and their application on shipbuilding technical drawings	60
Annex G (informative) Application examples of the different types of lines on shipbuilding technical drawings	62
Bibliography	73
