

# ISO 5167-4:2022-06 (E)

## Measurement of fluid flow by means of pressure differential devices inserted in circular cross-section conduits running full - Part 4: Venturi tubes

---

| <b>Contents</b> |  | <b>Page</b> |
|-----------------|--|-------------|
|                 | <b>Foreword</b> .....  | <b>v</b>    |
|                 | <b>Introduction</b> .....  | <b>vi</b>   |
| <b>1</b>        | <b>Scope</b> .....   | <b>1</b>    |
| <b>2</b>        | <b>Normative references</b> .....  | <b>1</b>    |
| <b>3</b>        | <b>Terms and definitions</b> .....   | <b>2</b>    |
| <b>4</b>        | <b>Principles of the method of measurement and computation</b> .....   | <b>2</b>    |
| <b>5</b>        | <b>Classical Venturi tubes</b> .....   | <b>2</b>    |
| 5.1             | Field of application.....  | 2           |
| 5.1.1           | General.....   | 2           |
| 5.1.2           | Classical Venturi tube with an “as cast” convergent section.....   | 3           |
| 5.1.3           | Classical Venturi tube with a machined convergent section.....   | 3           |
| 5.1.4           | Classical Venturi tube with a fabricated convergent section.....   | 3           |
| 5.2             | General shape.....   | 3           |
| 5.2.1           | General.....   | 3           |
| 5.2.2           | Entrance cylinder.....   | 3           |
| 5.2.3           | Convergent section.....  | 4           |
| 5.2.4           | Throat.....  | 4           |
| 5.2.5           | Divergent section.....   | 5           |
| 5.2.6           | Truncated Venturi tube.....  | 5           |
| 5.2.7           | Roughness.....   | 5           |
| 5.2.8           | Classical Venturi tube with an “as cast” convergent section.....   | 5           |
| 5.2.9           | Classical Venturi tube with a machined convergent section.....   | 6           |
| 5.2.10          | Classical Venturi tube with a fabricated convergent section.....   | 6           |
| 5.3             | Material and manufacture.....  | 7           |
| 5.4             | Pressure tappings.....   | 7           |
| 5.5             | Discharge coefficient, $C$ .....   | 8           |
| 5.5.1           | Limits of use.....   | 8           |
| 5.5.2           | Discharge coefficient of the classical Venturi tube with an “as cast” convergent section.....                        | 8           |
| 5.5.3           | Discharge coefficient of the classical Venturi tube with a machined convergent section.....                          | 9           |
| 5.5.4           | Discharge coefficient of the classical Venturi tube with a fabricated convergent section.....                        | 9           |
| 5.6             | Expansibility [expansion] factor, $\epsilon$ .....   | 9           |
| 5.7             | Uncertainty of the discharge coefficient, $C$ .....  | 9           |
| 5.7.1           | Classical Venturi tube with an “as cast” convergent section.....   | 9           |
| 5.7.2           | Classical Venturi tube with a machined convergent section.....   | 9           |
| 5.7.3           | Classical Venturi tube with a fabricated convergent section.....   | 10          |
| 5.8             | Uncertainty of the expansibility [expansion] factor, $\epsilon$ .....  | 10          |
| 5.9             | Pressure loss.....   | 10          |
| 5.9.1           | Definition of the pressure loss.....   | 10          |
| 5.9.2           | Relative pressure loss.....  | 10          |
| <b>6</b>        | <b>Installation requirements</b> .....   | <b>11</b>   |
| 6.1             | General.....   | 11          |
| 6.2             | Minimum upstream and downstream straight lengths for installation between various fittings and the Venturi tube..... | 12          |
| 6.3             | Flow conditioners.....   | 16          |
| 6.4             | Additional specific installation requirements for classical Venturi tubes.....                                       | 16          |

|          |   |           |
|----------|---|-----------|
| 6.4.1    | Circularity and cylindricality of the pipe and alignment of the classical Venturi tube.....     | 16        |
| 6.4.2    | Roughness of the upstream pipe.....   | 17        |
| <b>7</b> | <b>Flow calibration of Venturi tubes</b> .....  | <b>17</b> |
| 7.1      | General.....  | 17        |
| 7.2      | Test facility.....  | 17        |
| 7.3      | Meter installation.....   | 18        |
| 7.4      | Design of the test programme .....  | 18        |
| 7.5      | Reporting the calibration results .....   | 18        |
| 7.6      | Uncertainty analysis of the calibration .....   | 18        |
| 7.6.1    | General .....   | 18        |
| 7.6.2    | Uncertainty of the test facility .....  | 18        |
| 7.6.3    | Uncertainty of the Venturi tube.....  | 19        |
|          | <b>Annex A (informative) Table of expansibility [expansion] factor</b> .....                    | <b>20</b> |
|          | <b>Annex B (informative) Classical Venturi tubes used outside the scope of ISO 5167-4</b> ..... | <b>21</b> |
|          | <b>Annex C (informative) Pressure loss in a classical Venturi tube</b> .....                    | <b>24</b> |
|          | <b>Bibliography</b> .....   | <b>26</b> |
