European foreword 4

Foreword 5

Introduction 6

1 Scope 7

2 Normative references 7

3 Terms and definitions 7

4 Symbols and abbreviated terms 8

5 Calibration, adjustment and verification of an instrument 9
5.1 General 9
5.2 Methods for calibration, adjustment and verification 9
5.3 Instrument calibration procedure 10
5.3.1 Calibration by measurement standards 10
5.3.2 Handling of defects on material measures 10
5.3.3 Measurement procedures for calibration with measurement standards 10
5.3.4 Calibration conditions 10

6 Determination of the metrological characteristics of the instrument 11
6.1 General 11
6.2 Reporting of the measurement conditions 11
6.3 Handling of non-measured points 11
6.4 Handling of spurious data and outliers 11
6.5 Metrological characteristic: measurement noise, NM, and instrument noise, NI 11
6.5.1 General 11
6.5.2 Determination of measurement and instrument noise: application of filters or operators 12
6.5.3 Determination of measurement and instrument noise: material measures for instrument and measurement noise estimation 12
6.5.4 Determination of measurement and instrument noise: procedure for the determination of measurement noise 12
6.6 Determination of flatness deviation 16
6.6.1 General 16
6.6.2 Material measure for determination of flatness deviation 16
6.6.3 Procedure for determination of flatness deviation 16
6.6.4 Improvement of flatness deviation estimation 16
6.6.5 Application of filters and operators 17
6.6.6 Calibration of flatness deviation 17
6.7 Determination of the amplification coefficient z for the z-axis 17
6.7.1 General 17
6.7.2 Determination of the amplification coefficient z for the z-axis: material measures 17
6.7.3 Procedure for determination of amplification coefficient z for the instrument z-axis 18
6.7.4 Type PGR (profile-groove-rectangular): groove, straight (rectangular or trapezoidal) measurement areas 18
6.7.5 Other material measures for the instrument z-axis calibration 20

6.7.6 Procedure for determination of amplification coefficient z for the instrument z-axis: range and distance of measurement positions for the calibration of the z-scale of the instrument ... 21
6.7.7 Range and distance of measurement position for the calibration of a reduced z-scale of the instrument ... 21
6.8 Determination of z-linearity deviation lz ... 21
6.8.1 General ... 21
6.8.2 Determination of the complete and local z-linearity deviation lz: z-scan range ... 21
6.8.3 Determination of z-linearity deviation lz ... 21
6.8.4 Determination of z-linearity deviation lz: sizes of step heights to be measured ... 22
6.8.5 Determination of z-linearity deviation lz: positions within the instrument z-range ... 23
6.8.6 Determination of z-linearity deviation lz: Non-default methods ... 23
6.9 Determination of the amplification coefficients x and y in x- and y-direction and mapping deviation x (x,y) and y (x,y) ... 23
6.9.1 General ... 23
6.9.2 Determination of the amplification coefficient x and y in x- and y-direction and mapping deviation x (x,y) and y (x,y): material measures ... 24
6.9.3 Determination ofthe amplification coefficient x and y in x-and y-direction and mapping deviation x (x,y) and y (x,y): assessed measurement volume ... 25
6.9.4 Procedure for the determination of the amplification coefficient x and y and mapping deviation x (x,y) and y (x,y) of the x- and y-axes ... 26
6.10 Perpendicularity of the instrument z-axis with respect to the x-y areal reference ... 26
6.11 Topographic spatial resolution WR ... 26
6.11.1 General ... 26
6.11.2 Material measures for topographic spatial resolution ... 26
6.11.3 Instrument transfer function (ITF) curve fITF ... 27
6.11.4 Lateral period limit DLIM ... 27
6.11.5 Use of optical lateral resolution parameters ... 27
6.12 Topography fidelity TFI ... 27
6.12.1 General ... 27
6.12.2 Determination of the topography fidelity TFI using reference metrology ... 27
6.12.3 Determination of the small-scale fidelity limit TFIL ... 28
6.12.4 Slope-dependent effects ... 28

7 General information ... 28

Annex A (informative) Relation to the GPS matrix model ... 29

Bibliography ... 30
