

DIN EN ISO 14978:2006-11 (E)

Geometrical product specifications (GPS) - General concepts and requirements for GPS measuring equipment (ISO 14978:2006)

Contents		Page
Foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	6
4	Abbreviations	16
5	Design characteristics	17
5.1	General	17
5.2	Indicating measuring equipment	18
5.3	Material measures	18
6	Metrological characteristics	19
6.1	General	19
6.2	Identification, definition and choice of metrological characteristics	20
6.3	Indicating measuring equipment -- identification of general metrological characteristics	21
6.4	Material measures -- Identification of general metrological characteristics	23
7	Types of presentation and types of specifications for characteristics	25
7.1	General	25
7.2	Presentation of characteristic curves -- Fixed and floating zero	25
7.3	Presentation of a characteristic -- Statistical	28
7.4	Specifications for single-value metrological characteristics	29
7.5	Specification for metrological characteristics defined in a range	29
7.6	Specification for metrological characteristics defined in a two- or three-dimensional range	33
8	Calibration of metrological characteristics	33
8.1	Manufacturer and supplier of measuring instruments	33
8.2	User of measuring instruments	33
8.3	Measurement uncertainty	33
9	Marking	34
Annex A (normative)	General minimum requirements and guidance for clauses in GPS standards for specific measuring equipment	35
Annex B (informative)	Data sheet for measuring equipment requirements	37
Annex C (normative)	Relation to the GPS matrix model	39
